Great Political Thinkers: Plato to the Present William Ebenstein, 1960 **Philosophical Perspectives on Power and Domination**, 2021-09-20 The essays in this volume explore in detail many of the ways power structures our daily personal political and intellectual lives and evaluate the workings of power using a variety of theoretical paradigms from Hobbesian liberalism to Foucauldian feminist postmodernism Taken as a whole the book aims towards an end to unjust and destructive uses of power and the flowering of an encouraging educated empowerment for all human beings in a pluralistic world Section I offers a progressive chain of arguments that moves from the acceptance of domination through the rejection of domination and finally to a new vision of power based on equality and mutual respect Section II explores the questions how is the philosophical self that is our very understanding of who we are implicated in the web of power and domination Section III responds to political realism as it explores morally ideal solutions to the global problems of poverty war and hunger Section IV discusses ways in which our thought and practice in both public and private life are bound up in hierarchies of domination

Great Political Thinkers: Plato to the Present William Ebenstein, 1969 Celebrating its fiftieth year in publication GREAT POLITICAL THINKERS is an indispensable text for all students of political philosophy This text contains portions of great works in their original form to whet the appetite and to encourage discussion within the classroom By providing historical context and current scholarship Alan Ebenstein builds upon the framework of influences that have shaped current political thoughts and theories **The Five Thousand Year Leap** W. Cleon Skousen, The Founding Fathers of the United States of America created the first free people in modern times They wrote a new kind of Constitution which is now the oldest in existence They built a new kind of commonwealth designed as a model for the whole human race They believed it was thoroughly possible to create a new kind of civilization giving freedom equality and justice to all The Founders created a new cultural climate that gave wings to the human spirit They built a free enterprise culture to encourage industry and prosperity They gave humanity the needed ingredients for a gigantic 5 000 year leap in which more progress has been made in the past 200 years than all of prior recorded human history All of this came about because of 28 basic principles the Founders discovered upon which all free nations must be built in order to succeed This eBook includes the original index footnotes table of contents and page numbering from the printed format and also new illustrations *Approaches to Political Thought* William L. Richter, 2009-03-16 *Approaches to Political Thought* raises three important questions concerning traditional political thought 1 Why study the political writings and ideas of Plato Machiavelli and other long dead writers 2 Who among the writers and which of their works are worth studying 3 How should they be studied The book then explores ten contemporary approaches to understanding political thought and the diverse answers to these questions The approaches covered include those of Leo Strauss Hannah Arendt Eric Voegelin Sheldon Wolin the Cambridge School Quentin Skinner and J G A Pocock Psychobiography Critical Theory of the Frankfurt School Herbert Marcuse and Jürgen Habermas

Hermeneutics Paul Ricoeur and Hans Georg Gadamer Michel Foucault and Feminist Criticism Susan Moller Okin and Jean Elshtain Each chapter includes an introductory essay and edited selections that illustrate or discuss that approach Each chapter concludes with discussion questions and suggestions for further exploration including books articles and web sites This exploration of contending contemporary approaches to political thought touches upon ongoing methodological and philosophical issues that are relevant to several academic disciplines including political science history philosophy and psychology
