Michael Tribe, Frederick Nixon, Andy Sumner, 2010-09-13 Development studies textbooks and courses have sometimes tended to avoid significant economic content. However, without an understanding of the economic aspects of international development, many of the more complex issues cannot be fully comprehended. Economics and Development Studies makes the economic dimension of discourse around controversial issues in international development accessible to second and third year undergraduate students working towards degrees in development studies. Following an introductory chapter outlining the connections between development economics and development studies, this book consists of eight substantive chapters dealing with the nature of development economics, economic growth and structural change, economic growth and developing countries, economic growth and economic development since 1960, the global economy and the Third World, developing countries and international trade, economics and development policy, and poverty, equality and development. Economists with a tenth concluding chapter. This book synthesizes existing development economics literature in order to identify the salient issues and controversies and make them accessible and understandable. The concern is to distinguish differences within the economics profession and between economists and non-economists so that the reader can make informed judgments about the sources of these differences and about their impact on policy analysis and policy advice. The book features explanatory text boxes, tables, and diagrams, suggestions for further reading, and a listing of the economic concepts used in the chapters.

The Elusive African Renaissance George Klay Kieh, Jr., 2018-08-28 Africa faces several major development challenges that have adversely affected the political and material well-being of the majority of the people living there. This collection of new essays rigorously analyzes those frontier development issues including democracy, leadership, the economy, poverty alleviation through microfinance schemes, food security, education, health, and political instability, and offers prescriptions that differ from the dominant neoliberal solutions.

Sociology of Development in South Asia Ashek Mahmud, Farhana Zaman, M. Rezaul Islam, 2025-11-12 This textbook specifically focuses on sociology of development in the South Asian context. Its exclusive focus on the intricate relationship between key theories and the developmental context of South Asia makes this textbook an invaluable source for graduate students in sociology, development studies, Asian studies, and related fields. Topics such as urban and rural development, the environment, and gross national happiness are explored alongside a critical examination of relevant policies and programmes such as the Sustainable Development Goals (SDGs). Innovatively, the authors propose a Normative Composite Model as an alternative, practical, and context-specific approach tailored to the specific needs of low and middle income countries in South Asia.
