*Perspectives on Thinking, Learning, and Cognitive Styles* Robert J. Sternberg, Li-fang Zhang, 2014-04-08 This volume presents the most comprehensive balanced and up to date coverage of theory and research on cognitive thinking and learning styles in a way that represents diverse theoretical perspectives includes solid empirical evidence testing the validity of these perspectives and shows the application of these perspectives to school situations as well as situations involving other kinds of organizations International representation is emphasized with chapters from almost every major leader in the field of styles Each chapter author has contributed serious theory and or published empirical data work that is primarily commercial or that implements the theories of others The book s central premise is that cognitive learning and thinking styles are not abilities but rather preferences in the use of abilities Traditionally many psychologists and educators have believed that people s successes and failures are attributable mainly to individual differences in abilities However for the past few decades research on the roles of thinking learning and cognitive styles in performance within both academic and nonacademic settings has indicated that they account for individual differences in performance that go well beyond abilities New theories better differentiate styles from abilities and make more contact with other psychological literatures recent research in many cases is more careful and conclusive

than are some of the older studies Cognitive learning and thinking styles are of interest to educators because they predict academic performance in ways that go beyond abilities and because taking styles into account can help teachers to improve both instruction and assessment and to show sensitivity to cultural and individual diversity among learners They are also of interest in business where instruments to assess styles are valuable in selecting and placing personnel The state of the art research and theory in this volume will be of particular interest to scholars and graduate students in cognitive and educational psychology managers and others concerned with intellectual styles as applied in educational industrial and corporate settings
