### **I. PH.D. IN ENGINEERING**

The author considers an important experience and task to write something about this topic because in recent years, there has been an increasing number of students who wish to pursue a doctorate degree in engineering, and yet most students do not know what they have entered; thus, ending up miserably and have not finished. While obtaining a PhD in engineering is an individual triumph. The calculated risk and cost is too high to take. As the saying goes, *many are called but few are chosen*. A clear goal and vision is a must for every students before entering in this new path. It is important to consider that staying actively in a technical career and research engagement should be your prime goal and motivation. Taking a doctorate degree in engineering is a mental, financial, physical, spiritual, and emotional struggle where you need to face doubts and fears. Being brave, and utmost determination is required, which is expected for the potential students.

Entering a PhD program is a serious business. Most students are not sure what they are apt to. Hence, they could not get out of it. They applied, enrolled, take courses, but never had a clear goal and vision with what they are going to do. A vision to publish papers and do researches. Never have a clear vision on how they could get out of the program in a shortest possible period of time.

The excitement of PhD normally starts in the beginning. Motivation is very high at the start of the first semester class but in the middle years and in the long run, motivation keeps on decreasing. Gradually, as years passes by, you will lose interest in continuing and what stays is the commitment.

PhD is a very long term investment; students are investing themselves to be a good researcher. It is depth and not broad. A deep understanding on a certain and chosen topic. Hence, a potential student entering the program are expected to be dedicated, motivated, committed, and notorious hard workers. A high technical knowledge is a requirement before entering the program. Often, the best candidates have a working experience in a research and development (often known as R&D) environment, have
