Electromagnetic Fields In Electrical Engineering:

Electromagnetic Fields in Electrical Engineering A. Savini, J. Turowski, 2012-12-06 This book is the collection of the contributions offered at the International Symposium on Electromagnetic Fields in Electrical Engineering ISEF 87 held in Pavia Italy in September 1987 The Symposium was attended by specialists engaged in both theoretical and applied research in low frequency electromagnetism The charming atmosphere of Pavia and its ancient university provided a very effective environment to discuss the latest results in the field and at the same time to enjoy the company of colleagues and friends coming from over 15 countries The contributions have been grouped into 7 chapters devoted to fundamental problems computer programs transformers rotating electrical machines mechanical and thermal effects various applications and synthesis respectively Such a classification is merely to help the reader because a few papers could be put in several chapters Over the past two decades electromagnetic field computations have received a big impulse by the large availability of digital computers with better and better performances in speed and capacity Many various methods have been developed but not all of them appear convenient enough for practical engineering use In fact the technical and industrial challenges set some principal attributes and criteria for good computation methods They should be relatively easy to use fit into moderately sized computers yield useful design data maintain flexibility with minimum cost in time and effort *Electromagnetic Fields in Electrical Engineering* Andrzej Krawczyk, S. Wiak, 2002 This volume includes contributions on field theory and advanced computational electromagnetics electrical machines and transformers optimization and interactive design electromagnetics in materials coupled field and electromagnetic components in mechatronics induction heating systems bioelectromagnetics and electromagnetics in education **Electromagnetic Fields in Electrical Engineering** P.C.T. van der Laan, 2005 Introduction to Electromagnetic Fields Clayton R.
