Toscano-Fuentes, Carmen María Martín Del Pino, 2025-03-12 In general scientific inquiry about the benefits of digital gadgets focused on learning at all stages of Education is providing cognitive affective and attitudinal variables However cognitive effects stand out among these effects In this topic of inquiry that we propose we intend to investigate the phenomenon from a simple discipline to a multidisciplinary point of view that is from interventions that work transversally on some transversal theme in different disciplines or with a review approach from various points of view We also propose it to deepen the phenomenon with interventions that are investigated from an interdisciplinary perspective taking into account the qualitative and or quantitative study of a variable from one discipline and another

variable from another discipline Likewise other studies of the cognitive effects of technologies in learning with paradigms or innovative approaches and evaluation of more complex interventions can be considered We are in a moment of transition from the use of analogue materials to digital tools platforms applications gadgets tablets mobiles etc and advanced technology formats immersive realities and artificial intelligence This is a moment of technological transformation in which the benefits of new technologies in learning are beginning to be investigated both in interventions with grouping in individual perspective or in an interactive and collaborative perspective among equals It also coincides with the development of neuroscience and psychology applied to Education This research topic aims to contribute to deepen this topic and provide a global vision It also intends to indicate to what extent the development of the cognitive is relevant as well as to extend the variables that must be considered
