Crafting Service Processes Jean Harvey, 2019-03-28 As the title makes clear this book is about the design and delivery

of service experiences This includes the design of installations facilities technologies and scripts used in the staging of such experiences It introduces the reader to many fundamental notions in service operations from positioning to execution with much attention paid to human experiences such as those of customers and service workers be they performing simple repetitive tasks or complex mental tasks The subject is treated in an user friendly manner with a storytelling context focusing initially on every day services coffee shops fast food supermarkets and then moving on to complex services lawyers physicians engineers accountants Contrary to popular hype not all service experiences are meant to be memorable If all you need is a cup of coffee and this is done quickly effortlessly and painlessly that s good If there s a little plus along the way that s better you ll make a mental note that this is a good place to stop next time you are in the area In an age of exponential technological change service delivery processes are changing quickly and service industries are being creatively destroyed You want to be the disruptor willing to disrupt a large part of your actual income streams The ability to maintain differentiation rests largely on an in depth understanding of the service experience and operational excellence The future belongs to the fastest learner Intuition is only part of the story
