*The Lean Startup* Eric Ries, 2011-09-13 Most startups fail But many of those failures are preventable The Lean Startup is a new approach being adopted across the globe changing the way companies are built and new products are launched Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively Inspired by lessons from lean manufacturing it relies on validated learning rapid scientific experimentation as well as a number of counter intuitive practices that shorten product development cycles measure actual progress without resorting to vanity metrics and learn what customers really want It enables a company to shift directions with agility altering plans inch by inch minute by minute Rather than wasting time creating elaborate business plans The Lean Startup offers entrepreneurs in companies of all sizes a way to test their vision continuously to adapt and adjust before it's too late Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever

**The Lean Startup** Eric Ries, 2017-02 In *The Lean Startup* the successful serial entrepreneur Eric Ries throws traditional thinking out of the window and presents his radically new methodology for building a successful business Most startups says Ries fail but they fail for preventable reasons Lean thinking is the key to success and represents the next paradigm shift in business management Most people assume that the key to a lucrative business is expert management a high performance product and good customer service But the real secret Ries argues is creating things that people want to buy in the first place Startups generally fail not because of missed

deadlines faulty products or blown budgets but because entrepreneurs are too focused on their vision on their great new idea and don't know what it is that their customers really want The solution according to Ries is lean thinking and validated learning Rather than designing an elaborate business plan and committing large amounts of financial and human resources from the start first find out what you can about your potential customers And rather than adopting a static product centric approach test your idea on your customers respond to their feedback and constantly be prepared to adjust your product as well as your business
