Rafek, 2017-01-20 This book presents the proceedings of the 4th International Conference on Integrated Petroleum Engineering and Geosciences 2016 ICIPEG 2016 held under the banner of World Engineering Science Technology Congress ESTCON 2016 at Kuala Lumpur Convention Centre from August 15 to 17 2016 It presents peer reviewed research articles on exploration while also exploring a new area shale research In this time of low oil prices it highlights findings to maintain the exchange of knowledge between researchers serving as a vital bridge builder between engineers geoscientists academics and industry

Oilfield Review ,2007 *Advances in the study of natural fractures in deep and unconventional reservoirs* Lei Gong, Kouqi Liu, Wei Ju, 2023-05-08 **Hart's Oil and Gas World** ,1999 **Encyclopedia of Optimization** Christodoulos A. Floudas, Panos M. Pardalos, 2008-09-04 The goal of the Encyclopedia of Optimization is to introduce the reader to a complete set of topics that show the spectrum of research the richness of ideas and the breadth of applications that has come from this field The second edition builds on the success of the former edition with more than 150 completely new entries designed to ensure that the reference addresses recent areas where optimization theories and techniques have advanced Particularly heavy attention resulted in health science and transportation with entries such as Algorithms for Genomics Optimization and Radiotherapy Treatment Design and Crew Scheduling **The use of Prosper in studying the Production Optimization of an Oil Well** Anireju Emmanuel Dudun, 2018-02-26 Bachelor Thesis from the year 2014 in the subject Engineering Power Engineering grade A University of Benin course Petroleum Engineering language English abstract Crude oil production is a major requirement to sustaining the well begins of any petroleum company This will entail the effective placement of all facilities and equipment surface or subsurface in order to achieve optimum volume of crude oil production this is usually called production optimization In this study the software prosper was utilized to case study well J 12T Well J 12T a natural producer was producing at its peak oil rate at 6137 STB d at 0% water cut by mid 1973 but since then production has been on the decline due to increasing water cut and decreasing reservoir pressure But to date the well is producing at an oil rate of 1431 STB d at a water cut of 50% The VLP IPR data were matched to well test flow rate

measurement with a deviation of about 0.0534% thereafter a short and long term optimization plan scenarios such as sensitivity runs on the well head pressure tubing sizes and gas lift technique respectively etc for the well were simulated in PROSPER and then evaluated. The results of this work suggests that by lowering the Christmas tree pressure from 180 to 120psi the well's life can be extended to 70% water cut also increasing the tubing size from 2.992 to 3.958 ID is also recommended. The gas lift method was found to be more economical as it can produce up to a maximum economic water cut of 90% with optimum gas injection rate of 3.3MMscf/d and oil production rates will increase from 1431 STB/d to about 3000 STB/d at 50% water cut.

Smart Well Production: Integrated Diagnostics, Flow

Assurance, and Performance Optimization in Oil and Gas Wells Yasin Khalili, Saeed Abassi, Seyed Mehdi Seyed Alizadeh, 2026-02-12 Smart Well Production Integrated Diagnostics Flow Assurance and Performance Optimization in Oil Gas Wells presents an integrated systems approach to optimizing hydrocarbon recovery with provision for operational reliability efficiency and sustainability in modern oil and gas production environments As reservoirs grow more complex from deepwater frontiers to unconventional shales and mature fields traditional siloed well management is inadequate It is bringing disciplines together to marry reservoir engineering production diagnostics flow assurance artificial lift and digital transformation into a unified strategy for intelligent well performance management IWPM The text begins with rudimentary ideas of wellbore hydraulics multiphase flow and PVT behavior and then moves through cutting edge technologies such as permanent downhole gauges PDGs distributed fiber optic sensing DTS DAS and real time surveillance systems It gives great space to predictive modeling uncertainty quantification and digital twins showing the way data driven insight can prevent flow assurance failure and improve system wide performance The theme of the book is the shift away from reactive triage toward proactive optimization enabled by combined nodal analysis closed loop control and machine learning algorithms that detect anomalies as problems before they happen The book outlines practical measures to curb hydrate and wax formation liquid loading sand generation and conformance related issues which are significantly supported by practical case studies which are based on offshore onshore deepwater and unconventional settings Later chapters explore the innovations in digital technology such as cloud based analytics systems autonomous well architectures robotic intervention systems and artificial intelligence enhanced decision making in the conceptualization of smart wells which are proposed to be the key to the future low carbon energy businesses One of the primary motifs is sustainable practice although the special attention is paid to the monitoring of emissions chemical optimization and energy efficiency which are all the components of the production excellence that cannot be neglected The paper is benchmarked to appeal to petroleum engineers completion specialists flow assurance analysts and digital oilfield practitioners incorporating the theoretical subtleties with a wrihtingly proven implementation Each of the chapters also has pedagogical tools such as tables figures worked out examples and best practice checklists to make the process of teaching easier and more approachable to practice Smart Well Production is not only a technical manual but also a strategic manual for turning plain wells into smart smart wells with self diagnosis self optimization and autonomous operation paving the way for the future of autonomous fields and cognitive reservoir management **Journal of Petroleum Technology** ,2007-07 **Geologically Storing Carbon** Peter Cook,2014-08-18 Carbon capture and geological storage CCS is presently the only way that we can make deep cuts in emissions from fossil fuel based large scale sources of CO₂ such as power stations and industrial plants But if this technology is to be acceptable to the community it is essential that it is credibly demonstrated by world class scientists and engineers in an open and transparent manner at a commercially significant scale The aim of the Otway Project was to do just this Geologically Storing

Carbon provides a detailed account of the CO₂CRC Otway Project one of the most comprehensive demonstrations of the deep geological storage or geosequestration of carbon dioxide undertaken anywhere This book of 18 comprehensive chapters written by leading experts in the field is concerned with outstanding science but it is not just a collection of scientific papers it is about learning by doing For example it explains how the project was organised managed funded and constructed as well as the approach taken to community issues regulations and approvals It also describes how to understand the site Are the rocks mechanically suitable Will the CO₂ leak Is there enough storage capacity Is monitoring effective This is the book for geologists engineers regulators project developers industry communities or anyone who wants to better understand how a carbon storage project really works It is also for people concerned with obtaining an in depth appreciation of one of the key technology options for decreasing greenhouse emissions to the atmosphere **SA Mining** ,2004 *Petroleum Geology of Northwest Europe* A.
