## **Electronic Flight Instrument System Efis:**

*Electronic Flight Instrument System (EFIS) Displays A-4 EFIS., 2016* This SAE Aerospace Standard AS specifies minimum performance standards for Electronic Flight Information System EFIS displays that are head down and intended for use in the flight deck by the flight crew in all 14 CFR Part 23 25 27 and 29 aircraft This document is expected to be used by multiple regulatory agencies as the basic requirement for a technical standard order for EFIS displays The requirements and recommendations in this document are intended to apply to but are not limited to the following types of display functions Primary Flight and Primary Navigation displays including vertical situation and horizontal situation functions Displays that provide flight crew alerts which may include engine instrument aircraft systems information control Control displays including communication navigation and system control displays Information displays which may include navigation displays used for situation awareness only supplemental data and maintenance and documentation displays Display Systems including a Display Unit display and a symbol generator The display functions herein were based on the display aspects of functions covered by previous TSOs that included an end to end system including sensors This document does not address video display terminals or video monitors without the means to generate symbols The symbol generating function may be contained within the display or may be external to the display unit and part of the display system This document is not intended to address the display of single function equipment e g airspeed Two functions are required as a minimum This document does not address the sensors or computational engines e g TAWs computer navigation computer or TCAS processor that transmit their data to the EFIS display Functions that are not covered in this document include Overspeed Warning Air Traffic Control Radar Beacon System ATRBS Mode Select Mode S Automatic Dependent Surveillance Broadcast ADS B Traffic Information System Broadcast TIS B Electronic Map Display Synthetic Vision Enhanced Vision Head Up Displays HUD and Head Worn Displays HWD This document does address the following types of control functions Control functions related to the data presented on the EFIS display s Control means that are integrated into the displays NOTE This document is expected to be used for a technical standard order for EFIS displays This document does not address the hardware physical or optical ocular requirements of the EFIS displays Those requirements are addressed in AS8034B This document is subject to change to keep pace with experience and technical advances Many functions often included in an EFIS in existing systems were considered for this MOPS In general the functions that were not included here were excluded because it was too complicated to extract and separate the display requirements from the sensor requirements In other cases the display requirements in the original MOPS were too extensive to add to this document without essentially replicating the original MOPS Applicants will need to apply separately for approval for those functions Historically FAA Technical Standard Orders TSOs and associated industry Minimum Operational Performance Specifications MOPS were developed to address sensor and indicator requirements for single functions such as airspeed altitude or fuel flow In contrast modern Electronic Flight Instrument System EFIS displays

normally present indications for multiple functions but do not normally include the sensor Until now a MOPS did not exist to address the operational functional requirements for such an EFIS display Requirements for this type of EFIS typically consist of a few requirements for each function drawn from many TSOs and associated MOPS As a result TSO applications for EFIS displays have multiple deviations to many TSOs and may include incomplete TSO authorizations This document is intended to facilitate EFIS TSO authorizations by addressing only the EFIS display requirements for a broad set of aircraft functions This document provides criteria for EFIS displays that are intended for use in the flight deck by the flight crew in aircraft to include but not limited to Title 14 CFR Part 23 25 27 and 29
