Scaling-Up Corporate Startups Ralph-Christian Ohr, Frank Mattes, 2018-12-09 This book focuses on one question How can large companies generate business impact from non incremental innovation The situation seems paradox Winning in non incremental innovation should be the domain of large corporates not of greenfield startups Yet 7 out of 8 corporate startups do not generate business impact And the media is full of stories that greenfield startups are attacking and even disrupting incumbents To stack the odds for success large corporates have tried to emulate the methods and approaches of greenfield startups They set up explorative innovation units called Innovation Centers Incubators Accelerators Digital Labs Innovation Outposts Fab Labs Maker Spaces etc Around the globe there are more than 600 of these But returns on innovation are decreasing despite increasing investments into innovation So apparently there is a problem We think that the root cause and hence the Archimedean point for solving the problem lies in one part of the end to end innovation process Corporates need to think one step further beyond their explorative innovation units They need to actively shape the phase that comes after a promising innovation concept has been found and validated We call this phase Scaling Up In this phase business impact is generated Success in this phase requires an orchestrated interplay between the corporate startup and the core organization built on a solid methodology The book is written for Top Managers and members of the Board who are concerned about the business impact that their innovation investments create It is also written for corporate practitioners working in explorative innovation units in Corporate Innovation Management Corporate Research Group Technology Corporate Strategy Corporate In house Consulting or in comparable functions And we also had Senior Management from Business Units BUs in mind when we wrote this book With excellence in Scaling Up a corporate startup has the entrepreneurial momentum of a small company and by leveraging the assets of its parent company an unfair advantage in the innovation race With every successful corporate scaleup the company not only increases growth EBIT and market cap it also actively reshapes its core business for tomorrow Without excellence in Scaling Up validated innovation concepts will not generate business impact In other words if a company is not good in Scaling Up all work done in the Ideation and Validation phases is just a costly hobby This book draws on our extensive consulting experience in this space and is co written with our clients We assembled a cross industry Peer Group of well known large European companies all of them widely seen as good innovators or even innovation leaders In the process the group members analyzed relevant research shared their Good Practices developed and validated methodological frameworks

and helped each other in Peer Coaching The reader of this book can benefit from the Peer Group s work and findings Some readers might be more interested in how to methods others more in practical experiences This book contains both It is organized in four parts Part 1 UNDERSTAND provides the thinking framework for excellence in Scaling up Part 2 PREPARE takes a closer look into the phase that precedes Scaling Up Part 3 SCALING UP presents the framework for effective Scaling Up that the Peer Group has co created Part 4 BUILDING THE ORGANIZATIONAL CAPABILITY features real life cases on how BP Robert Bosch Orange SIX Telefonica TRUMPF and T V Rheinland are aiming for excellence in Scaling Up

Faced with the choice of starting a company or joining a large corporation Steve Jobs believed that it was more fun to be a pirate than to join the navy But for innovators inside established companies making a distinction between being a pirate and joining the navy is a fallacy We have to figure out a way to become pirates in the navy There is nothing harder in business than trying to innovate within large corporations Innovators in big companies often face internal opposition as well as their external competitors It is the management of the core business that tends to get in the way of innovation Most intrapreneurs recognise that innovation can t be carried out as a series of one off projects that always have to jump through political hurdles They realise that there is a need for innovation to happen as a repeatable process But how can they achieve this This is a step by step guide to getting continuous innovation done in companies and reshaping them in the process It is for anyone involved in corporate innovation and driving company change
