Muthukumar, Dr. A.R.S. Kannan, Dr. K. Malini,

This edited book focuses on the possible education responses that can be implemented in future education. The impact of technology on learning and teaching is often at the forefront of demands, particularly from those who dictate the funding available to pay for technology within education systems. This is not an unreasonable request, and there is merit in the impact of a multidisciplinary approach that will reshape the future of education to provide efficient learning, teaching experiences, and assessments. Furthermore, the book discusses multidisciplinary and psychological approaches to teaching and learning, such as cognitive, metacognitive, and English language learning that can be applied in this rapidly moving multidisciplinary education. Particularly, a new multidisciplinary approach to learning to provide effective learning experiences, resulting in better learning outcomes, not only for their own learning but for others also. Future education should not solely focus on technology and psychology but also on the applied multidisciplinary approach as well as the human touch to maintain authentic and effective learning experiences. The book also discusses how teaching and learning can be intended to meet the growing tendency of future education in a multidisciplinary approach. This book aims to establish itself through published books, textbooks, and research as a medium to provide guidelines and recommendations for different stakeholders, including policy makers, educational designers, teachers, and students on how to enhance both learning and teaching experiences in the future for better learning outcomes, as well as how to maintain them in future education. It also provides one step ahead towards future education to prepare different stakeholders for the rapid evolution of education, even in times of critical situations.

[Lessons in Disability](#) Jacob Stratman, 2015-11-30. Disability is a growing reality. According to the United States Census Bureau, approximately 57 million people, 19 percent of the population, had a disability in 2010, more than half being reported as severe. Interest in disability studies is also growing in literature, film, art, politics, and religion. Exploring the intersection between disability and young adult literature, this collection of new essays fills a gap in scholarship between teachers and YAL scholars. The contributors offer textual analysis, best practices, and numerous examples that enable teachers to expose students to dynamic characters who both reflect and contrast with the reader's reality.
