of activity is at work within the human body So long as a man lives and indeed only during this time certain vital forces are active within him which reveal themselves in perception and motion These forces are identified with the soul A third standpoint has always been present in the observations which every one must make on his own character and on that of his fellowmen This observation of one s self and others personality is psychognosis The history of the attempts at such self knowledge began in ancient times and changed when scientific investigations too precedence Since however these efforts have appeared only in recent times and since we have chosen in the interest of historical objectivity to mark off our task at an earlier point it will be impossible to trace this development further Introduction PsycINFO Database Record c 2010 APA all rights reserved
