Digital Media Stacey O'Neal Irwin, 2016-04-29 Digital Media Human Technology Connection examines what it is like to be alive in today's technologically textured world and showcases specific digital media technologies that make this kind of world possible. So much of human experience occurs through digital media that reflection on the process and proliferation of digital consumption has become necessary. This book takes on that task through an interdisciplinary array of sources including philosophy, media studies, film studies, media ecology, and philosophy of technology. When placed in the interpretive lenses of artifact, instrument, and tool, digital media can be studied in a uniquely different way that pushes the boundaries on production, distribution, and communication and alters the way humans and technology connect with each other and the world. In the first section, Raw Materials, Stacey O'Neal Irwin examines pertinent concepts like digital media philosophy of technology, phenomenology, and postphenomenology. In the second, Feeling the Weave, Irwin uses the postphenomenological framework to explore empirical cases focused on deep analysis of screens, sound, photo manipulation, data mining, aggregate news, and self-tracking. Postphenomenological concepts like multistability, variational theory, microperception, macroperception, embodiment, technological mediation, are explored. Digital Media demonstrates that digital media technologies and digital content are not neutral. They texture the world in multiple and varied ways that transform human abilities, augment experience, and pattern the world in significant ways. *CMJ New Music Report*, 1999-02-15 *CMJ New Music Report* is the primary source for exclusive charts of non-commercial and college radio airplay and independent and trend-forward retail sales. *CMJ's* trade publication compiles playlists for college and non-commercial stations, often a prelude to larger success. **E-music** James Maguire, 2000 MP3 and other digital music technologies have enabled the Internet to become an increasingly popular medium for instant delivery of music.
