Engineering Federated Information Systems Stefan Conrad,Ralf-Detlef Kutsche,Wilhelm Hasselbring,2001 The aim of EFIS 2001 the fourth workshop in the sequence of the international workshops on engineering federated information systems is to intensify the exchange of ideas and experiences between academia and industrial practice EFIS 2001 was embedded as one part into the major event Information Federation Week Berlin 2001 including scientific and industrial workshops demos and discussions for the academic audience as well as for a broader of young and senior practitioners in industry and public services

Introduction to Data Systems Thomas Bressoud,David White,2020-12-04 Encompassing a broad range of forms and sources of data this textbook introduces data systems through a progressive presentation Introduction to Data Systems covers data acquisition starting with local files then progresses to data acquired from relational databases from REST APIs and through web scraping It teaches data forms formats from tidy data to relationally defined sets of tables to hierarchical structure like XML and JSON using data models to convey the structure operations and constraints of each data form The starting point of the book is a foundation in Python programming found in introductory computer science classes or short courses on the language and so does not require prerequisites of data structures algorithms or other courses This makes the material accessible to students early in their educational career and equips them with understanding and skills that can be applied in computer science data science data analytics and information technology programs as well as for internships and research experiences This book is accessible to a wide variety of students By drawing together content normally spread across upper level computer science courses it offers a single source providing the essentials for data science practitioners In our increasingly data centric world students from all domains will benefit from the data aptitude built by the material in this book

Deductive Databases and Their Applications Robert Colomb,2003-09-02 Deductive Databases and their Applications is an introductory text aimed at undergraduate students with some knowledge of database and information systems The text comes complete with exercises and solutions to encourage students to tackle problems practically as well as theoretically The author presents the origins of deductive databases in Prologue before proceeding to analyse the main deductive database paradigm the data log model The final chapters are dedicated to closely related topics such as propositional expert systems integrity constraint specification and evaluation and update propagation Particular attention is paid to CASE tool repositories

Query Optimization in Deductive and Relational Databases Inderpal S. Mumick,1991 Innovations Through Information Technology Information Resources Management Association. International Conference,2004-01-01 Innovations Through Information Technology aims to provide a collection of unique perspectives on the issues surrounding the management of information technology in organizations around the world and the ways in which these issues are addressed This valuable book is a compilation of features including the latest research in the area of IT utilization and management in addition to being a valuable source in support of teaching and research agendas Scientific and Technical Aerospace Reports ,1988 *New Trends in Databases and Information Systems* Tadeusz Morzy,Patrick Valduriez,Ladjel Bellatreche,2015-08-27 This book constitutes the thoroughly refereed short papers and workshop papers of the 19th East European Conference on Advances in Databases and Information Systems ADBIS 2015 held in Poitiers France in September 2015 The 31 revised full papers and 18 short papers presented were carefully selected and reviewed from 135 submissions The papers are organized in topical sections on ADBIS Short Papers Second International Workshop on Big Data Applications and Principles BigDap 2015 First International Workshop on Data Centered Smart Applications DCSA 2015 Fourth International Workshop on GPUs in Databases GID 2015 First International Workshop on Managing Evolving Business Intelligence Systems MEBIS 2015 Fourth International Workshop on Ontologies Meet Advanced Information Systems OAIS 2015 First International Workshop on Semantic Web for Cultural Heritage SW4CH 2015 First International Workshop on Information Systems for AlaRm Diffusion WISARD 2015

Deductive and Object-oriented Databases Stefano Ceri,Katsumi Tanaka,Shalom Tsur,1993 This volume contains the proceedings of the Third International Conference on Deductive and Object Oriented Databases Its central tenet is that the object oriented and deductive paradigms for modeling organizing and processing data complement each other rather than competing and that problems involving massive volumes of complex data can best be solved by integrating the best of both approaches Central questions in the area are How do we design a tool that presents the best of the object oriented and declarative ideas How can the users of this tool express their problems in a combination of declarative and procedural features The volume includes 29

papers that contribute towards answering these questions
