Philosophy at the Present Time Professor Edward Caird says that philosophy is not a first venture into a new field of thought but the rethinking of a secular and religious consciousness which has been developed in the main independently of philosophy If there be any inspiration and originality in this book they are due to my great desire that philosophy should appear in its vital relations to more familiar experiences If philosophy is as is commonly assumed appropriate to a phase in the development of every individual it should grow out of interests to which he is already alive And if the great philosophers are indeed never dead this fact should manifest itself in their classic or historical representation of a perennial outlook upon the world I am not seeking to attach to philosophy a fictitious liveliness wherewith to insinuate it into the good graces of the student I hope rather to be true to the meaning of philosophy For there is that in its stand point and its problem which makes it universally significant entirely apart from dialectic and erudition These are derived interests indispensable to the scholar but quite separable from that modicum of philosophy which helps to make the man The present book is written for the sake of elucidating the inevitable philosophy It seeks to make the reader more solicitously aware of the philosophy that is in him or to provoke him to philosophy in his own interests To this end I have sacrificed all else to the task of mediating between the tradition and technicalities of the academic discipline and the more common terms of life **The Approach to Philosophy**

John Herman Randall, Justus Buchler, 1944 *Fundamentals of Philosophy Series*, 200? The Problems of Philosophy John Grier Hibben, 1926 Introductory to Philosophy John Lewis, 1954 **Introductory Philosophy** Charles A. Dubray, Charles a Dubray Sm, Brother Hermenegild, 2014-10-11 The efforts which have been made in recent years to provide the beginner in philosophy with a ten book suited to his needs are justified both by the importance of the subject and by the requirements of educational method It is obvious that an introduction should really introduce in other words that it should presalt philosophy

in such a way as to arouse the student's interest, give him a firm grasp of essentials and encourage him to further study. But how these results are to be secured is still an open question. The books that have so far appeared have each from its own point of view distinct advantage either as outlining the history of philosophical problems or as setting forth the claims of rival systems or as explaining the principles which serve as the foundation of some special system and a basis of criticism in discussing variant theories. An introduction that will combine these several utilities seems to be our present need. Dr. Dubray's aim in this volume is to lead the student by easy approaches into the field of philosophy and to show him its divisions with their several problems and the solutions which these have received. In accordance with the principles of correct method the knowledge which the student has already acquired is made to serve as the starting point and from this he is led on to the consideration of more abstract philosophical concepts and theories. These again are presented in clear statement and orderly sequence with sufficient indication of outstanding questions yet without the mass of detail which sometimes destroys proportion or results in narrowness of view. At the same time definite conclusions are presented with the evidence on which they rest so that the student may get from his use of the book not merely a lot of vague questions but a certain amount of positive knowledge and critical direction for later investigation.
