Design can be identified and considered in the context of many activities related to publishing: creating a product ad in a magazine, designing the layout of a newspaper, authoring a book. Summarizing these examples as creating documents, these are activities where two challenges with respect to design have to be met: Designing the content, its structure, and its relationship to the existing knowledge of potential readers is one, while the other refers to the rhetorical aspects, including designing the presentation of the material in order to communicate the content. Publishing is communicating knowledge.
