allow this right to be enjoyed by each individual Through a legal comparative study the enforceability of the right to food is compared between the Netherlands and Belgium in light of the current UN Human Rights system There seems to be a difference between what the countries do what they say they do and what they should do on the matter As it appears the coincidental constitutional circumstances mainly determine the enforceability of the right to food rather than the content of the human right in itself This book includes a thorough analysis of suitable comparative legal methodology and the embedment of the right to food in the UN human right system Furthermore for both countries an in depth analysis of the case law on the right to food mostly concerning the status of foreigners the constitutional context in which the Judiciary operates and the relevant UN reports and subsequent procedures are outlined Finally recommendations are made to both countries and the relevant UN Committees
