Media, 2022-04-23T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The second great love story is the story of our quest for love from the world This story is no less intense than the first and its setbacks are no less painful 2 The Theory of Moral Sentiments is a book by Scottish philosopher and economist Adam Smith It explains how the pursuit of wealth power and prestige is not worth it It explains how the poor man is ashamed of his poverty while the rich man is proud of his riches because they draw attention 3 The desire to rise in the social hierarchy is rooted in the respect we receive as a result of high status While there are economic benefits to high status the impact of low status is often felt most strongly through the challenge it poses to a person s sense of self respect 4 The pain of being unnoticed is even worse than physical torture If no one turned around when we entered answered when we spoke or minded what we did but if every person we met treated us as if we were non existent things we would become enraged and desperate

The Architecture of Happiness Alain De Botton,2010-12-03 Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel and how we could build dwellings in which we would stand a better chance of happiness In this witty erudite look at how we shape and are shaped by our surroundings Alain de Botton applies Stendhal s motto that Beauty is the promise of happiness to the spaces we inhabit daily Why should we pay attention to what architecture has to say to us de Botton asks provocatively With his trademark lucidity and humour de Botton traces how human needs and desires have been served by styles of architecture from stately Classical to minimalist Modern arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks On an individual level de Botton has deep sympathy for our need to see our selves reflected in our surroundings he demonstrates with great wisdom how buildings just like friends can serve as guardians of our identity Worrying about the shape of our sofa or the colour of our walls might seem self indulgent but de Botton considers the hopes and fears we have for our homes at a new level of depth and insight When shopping for furniture or remodelling the kitchen we don t just consider functionality but also the major questions of aesthetics and the philosophy of art What is beauty Can beautiful surroundings make us good Can beauty bring happiness The buildings we find beautiful de Botton concludes are those that represent our ideas of a meaningful life The Architecture of Happiness marks a return to what Alain does best taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject As he did with Proust philosophy and travel now he does with architecture
