breakthroughs over and over again While all innovators possess incredible intellect intellect alone she shows does not create a breakthrough innovator It was their personal social and emotional quirks that enabled true genius to break through not just once but again and again Nearly all of the innovators for example exhibited high levels of social detachment that enabled them to break with norms an almost maniacal faith in their ability to overcome obstacles and a passionate idealism that pushed them to work with intensity even in the face of criticism or failure While these individual traits would be unlikely to work in isolation being unconventional without having high levels of confidence effort and goal directedness might for example result in rebellious behavior that does not lead to meaningful outcomes together they can fuel both the ability and drive to pursue what others deem impossible Schilling shares the science behind the convergence of traits that increases the likelihood of success And as Schilling also reveals there is much to learn about nurturing breakthrough innovation in our own lives in for example the way we run organizations manage people and even how we raise our children
