Stumbling On Happiness:

Stumbling on Happiness Daniel Gilbert, 2006-05-02 NATIONAL BESTSELLER Bringing to life scientific research in psychology cognitive neuroscience philosophy and behavioral economics this witty accessible book reveals what scientists have discovered about the uniquely human ability to imagine the future and about our capacity to predict how much we will like it when we get there Why are lovers quicker to forgive their partners for infidelity than for leaving dirty dishes in the sink Why will sighted people pay more to avoid going blind than blind people will pay to regain their sight Why do dining companions insist on ordering different meals instead of getting what they really want Why do pigeons seem to have such excellent aim why can't we remember one song while listening to another and why does the line at the grocery store always slow down the moment we join it In this brilliant book renowned Harvard psychologist Daniel Gilbert describes the foibles of imagination and illusions of foresight that cause each of us to misconceive our tomorrows and misestimate our satisfactions With penetrating insight and sparkling prose Gilbert explains why we seem to know so little about the hearts and minds of the people we are about to become

The Mini Book of Happiness. A scientific guide to becoming happy

Vladislav Tsekov, 2017-03-30 Seminar paper from the year 2015 in the subject Psychology Miscellaneous grade 1.0 LMU Munich language English abstract We want to be happy but what exactly does this mean Is happiness an emotion or a way of life is it temporary or constant is it something that depends on you or on your surroundings A specific branch in psychology positive psychology has embarked on a journey to find the answers to those and similar questions Everybody wants to be happy You me your best friend your family Even your boss Happiness is such a lucrative incentive that it motivates people to do the craziest things swimming with sharks jumping from airplanes dieting training and even working from 9 to 5 for their entire life Since happiness plays such an important part in our life we ought to know what it is and where we can easily find it right Wrong This is a challenging task resulting in years of wrong decisions and frustrating activities You set yourself a goal to become a lawyer and earn a lot of money You invest hundreds of hours into studying and practice spend thousands of dollars on education until you finally get into court and realize that this isn't what you wanted at all The problem is that we live in a society which is lacking introspection and self knowledge In most cases our parents teachers and friends tell us what is right for us They fool us into thinking that we have to strive for certain things in order to be happy Because we never question authority and we comply gently with societal pressure we end up with a major depression at the age of 30 So the next time you find yourself doing things other people have told you to do stop and think for a second if this is really what you want to do
