conventionalised form of writing that helps shape what knowledge is how we know it and for what purposes This highly original book challenges the notion of the empirical research article as neutral that it just is Analysis of a range of texts from the field of engaged research reveals both the dominance of scientific genre conventions and author led strategies to modify adapt and resist them In the final chapters a re imagined research article is proposed While speculative this is an important undertaking offered as critical and practical encouragement for a form of scholarly communication in which social and cognitive justice is not just acknowledged but is present
