Startupland Mikkel Svane, 2014-12-08 The real story of what it takes to risk it all and go for broke Conventional wisdom says most startups need to be in Silicon Valley started by young engineers around a sexy new idea and backed by VC funding But as Mikkel Svane reveals in Startupland the story of founding Zendesk was anything but conventional Founded in a Copenhagen loft by three thirty something friends looking to break free from corporate doldrums Zendesk Inc is now one of the hottest enterprise software companies still rapidly growing with customers in 150 countries But its success was anything but predestined With revealing stories both funny and frank Mikkel shares how he and his friends bravely left secure jobs to start something on their own how he almost went broke several times how they picked up themselves and their families to travel across the world to California and the unknown and how the three friends were miraculously still together for Zendesk's IPO and still growing success Much like Zendesk's mission itself to remove friction barriers and mystery in order to make customer service easier and more approachable Startupland removes some of the myths about startups and startup founders Mikkel's advice hard won through experience often bucks conventional wisdom and entrepreneurial tropes He shares why failure whether fast or slow is awful why a seemingly boring product or idea can be the most exciting why giving back to the community is as important as the bottom line From how to hire right look for people who are not offended by swearing to which personas generate the highest response rates Mikkel answers the most pressing questions from the perspective of someone still in the trenches and willing to share the hard truth warts and all While there are books by consultants who tell you how to build businesses or by entrepreneurs now running billion dollar businesses there are few books from people still in the trenches who acutely remember the difficult daily decisions the thrill and fears of the early days the problems that scale with growing a business and the reason why they all went on the adventure in the first place Startupland is indispensable reading for all entrepreneurs who want to make their ideas the next big thing The book will inspire and empower you to follow your own dream and create your own story [Summary of Startupland - \[Review Keypoints and Take-aways\]](#)

Calzonetti,1989-07-10 This book grew out of a study that was commissioned by the West Virginia University Energy and Water Research Center It was designed to assess the impact of electricity imports on West Virginia s economy and to determine what efforts if any should be made to increase electricity exports Because organizations involved in the electricity industry operate on the multi state level the outcome is a work that considers the electricity trade from the Appalachians to the Northeast and the physical political geographic and economic factors influencing this trade now and in the future Early chapters provide an introduction to and overview of the American electricity industry Twenty years ago energy forecasters predicted that electricity demand would grow at a healthy rate and that the only way to satisfy future demand was to build new and usually larger power plants Little if any thought was given to electricity conservation alternatives to centralized power plants or changing demand patterns This mentality brought disaster to many utility companies that ordered unnecessarily expensive power plants Recent thinking dictates that the nation has sufficient generating supply conservation can reduce the need for power plants and those plants that are needed can be smaller locally sited facilities This perception is quickly changing the authors contend as certain regions are now in a dangerous position because energy demand is increasing and existing capacity is aging The balance of the book discusses the steps that must be taken to insure cost effective use of electricity and the addition of new supplies Among the issues considered are the power trade alternative the economic impacts of the electricity industry using West Virginia as a test case acid rain Canadian power imports siting energy facilities and the cost effectiveness of the various strategies Given the diverse backgrounds of the coauthors this book will have widespread appeal in the fields of economics electrical engineering geography mineral resource economics and political science Members of the electrical industry itself should also consider this book as they grapple with guaranteeing the nation s energy supply into the next century
