**Futureproofing Engineering Education for Global Responsibility** Michael E. Auer, Tiia Rüttemann, 2025-03-20 This book contains papers in the fields of Green transition in education, New generation of engineering students, Entrepreneurship in engineering education, Open education, best practices, Project based learning, PBL, Teaching best practices. We are currently witnessing a significant transformation in the development of education on all levels and especially in post-secondary and higher education. To face these challenges, higher education must find innovative and effective ways to respond in a proper way. Changes have been made in the way we teach and learn, including the massive use of new means of communication such as videoconferencing and other technological tools. Moreover, the current explosion of artificial intelligence tools is challenging teaching practices maintained for centuries. Scientifically based statements as well as excellent best practice examples are necessary for effective teaching and learning engineering. The 27th International Conference on Interactive Collaborative Learning (ICL2024) and 53rd Conference of International Society for Engineering Pedagogy (IGIP) which took place in Tallinn, Estonia, between September 24 and 27, 2024, was the perfect place where current trends in Higher Education were presented and discussed. IGIP conferences have been held since 1972 on research results and best practices in teaching and learning from the point of view of engineering pedagogy science. ICL conferences have been held since 1998, being devoted to new approaches in learning with a focus on collaborative learning in higher education. Nowadays, the ICL conferences are a forum for the exchange of relevant trends and research results as well as the presentation of practical experiences in learning and engineering pedagogy. In this way, we try to bridge the gap between pure scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy.
