This engaging text provides an effective process for studying multiple cases such as sets of teachers staff development sessions or clinics operating in different locations within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Perfect for fans of *Nerve*. Being recruited by the CIA to join a top secret intelligence program should be the opportunity of a lifetime. For Issa it's a shot at creating a new and better life for herself and her siblings. For clever con artist Harper it's a chance to bury the secrets of her troubled past and make sure that those secrets stay buried. But for Owen honor student star quarterback and computer hacking genius it sounds like a trap. He's right. Owen discovers that instead of auditioning for the CIA they've all been tricked by a multibillion dollar tech company into creating the ultimate computer virus. It's called Phantom Wheel and it's capable of hacking anyone on Earth anywhere at any time. And thanks to six teenagers it's virtually unstoppable. Horrified by what they've done the hackers must team up to stop the virus before the world descends into chaos. But working together is easier said than done especially as the lines start to blur between teammate friend and more than friend. Because how do you learn to trust someone when you've spent your entire life exploiting that same trust in others. **Sustainable Design and Manufacturing 2014 Part 1** R. Setchi, R.J. Howlett, M.
