Practical Tips For Teaching Multigrade Classes 2013:

Perspectives on Multigrade Teaching Linley Cornish, Matshidiso Joyce Taole, 2021-10-25 This book contains the results of research projects carried out in relation to multigrade teaching in Australia and South Africa. Research in multigrade contexts is not commonly reported and rarely in book form. The research results have implications for multigrade teachers, government education personnel, and university teacher educators. The book also contains chapters with practical advice for multigrade teachers, including examples of multigrade teaching used in an Australian seven-grade class, kindergarten to grade 6. Other chapters contain suggestions for practical strategies a multigrade teacher can use to reduce the workload involved in planning for multiple grades. Very little is published in the area of multigrade teaching, yet the number of multigrade schools worldwide is huge. Developed countries still have a significant proportion of multigrade schools, commonly one-fifth to one-third of all primary schools or classes. Despite decades of centralisation of schools and expansion of transport networks, the number of these schools remains high, mostly in rural areas. Developing countries established multigrade schools in rural areas in order to achieve the UN Millennium Development Goal of Universal Primary Education. Yet specific training to teach a multigrade class remains virtually non-existent in initial teacher education programs worldwide. The value of this book is thus to report specific research carried out in multigrade contexts but also to provide practical help for multigrade teachers. This help is needed as the teachers strive to achieve the UN Sustainable Development Goal of a quality education through helping their students develop the skills and behaviours required for 21st-century learning.

The Future of Ubiquitous Learning Begoña Gros, Kinshuk, Marcelo Maina, 2015-07-28 This book explores emerging pedagogical perspectives based on the design of new learning spaces supported by digital technologies and brings together some of the best research in this field. The book is divided into three themes: foundations of emerging pedagogies, learning designs for emerging pedagogies, and adaptive and personalized learning. The chapters provide up-to-date information about new pedagogical proposals and examples for acquiring the requisite skills to both design and support learning opportunities that improve the potential of available technologies.

Ensuring All Children Learn Ishmael I. Munene, 2021-08-23 *Ensuring All Children Learn: Lessons from the South on What Works in Equity and Inclusion* brings together a rich tapestry of cases from three southern continents, focusing on issues germane to the access, learning, and retention in basic education in the context of Education for All (EFA). It is a narrative of both the disappointment that the implementation of EFA did not go as envisaged and of policy alternatives and hopes for a brighter future. The focus on Africa, Asia, and Latin America permits the reader to appreciate both the diversity of issues central to EFA and the physical spread of the challenges. The book confirms that whereas southern countries have adopted EFA as an overall policy goal, empirical evidence from the case studies uncovers critical lapses in policies and strategies. Four key issues inform the thematic analysis in the book: the overall experience in implementing EFA, the specific challenges faced, the lessons learned, and prospects for

the future The solutions to these challenges provide avenues for the attainment of basic education for all school eligible children in tandem with the UN Sustainable Development Goal 4 on education

Multi-grade Teaching Angela Little,1995 The single grade model of education based on the division of labor in industry has come to dominate the school class and curriculum organization used by central authorities Although the multi grade model is common in developing countries and in rural areas of industrialized countries the knowledge required for effective multi grade teaching is ignored and rendered illegitimate by those responsible for training and supporting teachers This review presents five innovations in multi grade teaching in developing countries The Zambian experience is less than 10

years old and relatively small scale The Colombian experience with Escuela Nueva spans 3 decades and is large scale Both involve external agencies and support from the government mainstream The Peruvian experience describes the multi grade reality found among indigenous communities and the recent involvement of nongovernmental organizations in multi grade teacher education programs The fourth example from Sri Lanka illustrates how some problems faced by multi grade teachers can be solved by recognizing that even mono grade classes contain very wide differences in achievement and that a single grade may be conceived as a multi grade context The final experience describes Project Impact which began as a radical reform of primary education in Indonesia and the Philippines and expanded to Liberia Malaysia Bangladesh and Jamaica Research on the outcomes and costs of multi grade teaching is reviewed and implications for the practice of multi grade teaching are presented Contains 61 references and an annotated bibliography with 52 entries TD
