Centrifuges in Soil Mechanics W.H. Craig,R.G. James,A.N. Schofield,2020-08-26 This book contains technical papers presented in a discussion session at the XI International Conference on Soil Mechanics and Foundation Engineering held in San Francisco in 1985 on the role of centrifuge in geotechnical testing with descriptions of test facilities **Cone Penetration Testing 2018** Michael A. Hicks,Federico Pisanò,Joek Peuchen,2018-06-13 Cone Penetration Testing 2018 contains the proceedings of the 4th International Symposium on Cone Penetration Testing CPT 18 Delft The Netherlands 21 22 June 2018 and presents the latest developments relating to the use of cone penetration testing in geotechnical engineering It focuses on the solution of geotechnical challenges using the cone penetration test CPT CPT add on measurements and companion in situ penetration tools such as full flow and free fall penetrometers with an emphasis on practical experience and application of research findings The peer reviewed papers have been authored by academics researchers and practitioners from many countries worldwide and cover numerous important aspects ranging from the development of innovative theoretical and numerical methods of interpretation to real field applications This is an Open Access ebook and can be found on www.taylorfrancis.com **Centrifuge Modeling of LNAPL Movement in the Vadose Zone** Hideo Nakajima,2002 *Frontiers in Offshore Geotechnics II* Susan Gourvenec,David White,2010-10-04 Frontiers in Offshore Geotechnics II comprises the Proceedings of the Second International Symposium on Frontiers in Offshore Geotechnics ISFOG organised by the Centre for Offshore Foundation Systems COFS and held at the University of Western Australia UWA Perth from 8 10 November 2010 The volume addresses current and emerging challenges **Progress in Geotechnical Dynamic Centrifuge Modeling** A. Anandarajah,1985 This report discusses the history and technical advances of centrifuge modeling of highly dynamic geotechnical events Difficulties and validity of centrifuge modeling technology are presented along with examples of dynamic centrifuge modeling and advantages of using centrifuge modeling technology to study the behavior of geotechnical structures The centrifuge modeling technique has a tremendous potential for experimentally determining the behavior of soils and soil structure interaction problems The prototype stresses and strains are correctly modeled in a centrifuge model by the application of centrifugal acceleration Past experiments clearly demonstrate the feasibility of performing dynamic centrifuge modeling under earthquake loading machine vibration and blast loading environments There are however difficulties associated with dynamic centrifuge modeling some of which can be overcome by performing experiments in large capacity centrifuges The remaining difficulties require further research and development *Proceedings of the Fifth International Conference on Geotextiles, Geomembranes, and Related Products, Singapore, 5-9 September 1994* G.
