ENGLISH ACROSS DISCIPLINES: Proceedings of the Applied Linguistics and Language Teaching Conference 2022

Contributors: ,2024-02-09 This volume contains a selection of articles that were originally presented at the Applied Linguistics and Language Teaching International Conference and Exhibition ALLT 2022 held at Zayed University Dubai United Arab Emirates in March 2022 The articles in this volume represent the diverse backgrounds experiences and research interests of the ALLT presenters They cover a range of theoretical empirical and pedagogical practices with a strong emphasis on language teaching While most of the papers focus on English language the findings and lessons are applicable to the teaching of any language This makes the volume an invaluable resource addressing important aspects of contemporary research topics and the pedagogy of language teaching

Technical Communication John M. Lannon,2003 Addressing a wide range of interests for classes in which students from a variety of majors are enrolled Technical Communication ninth edition combines practical applications with clear writing and examples Rhetorical principles are explained illustrated and applied to an array of documents

A Scientific Approach to Writing for Engineers and Scientists Robert E. Berger,2014-05-23 A SCIENTIFIC APPROACH TO WRITING Technical ideas may be solid or even groundbreaking but if these ideas cannot be clearly communicated reviewers of technical documents e g proposals for research funding articles submitted to scientific journals and business plans to commercialize technology are likely to reject the argument for advancing these ideas The problem is that many engineers and scientists entirely comfortable with the logic and principles of mathematics and science treat writing as if it possesses none of these attributes The absence of a systematic framework for writing often results in sentences that are difficult to follow or arguments that leave reviewers scratching their heads This book fixes that problem by presenting a scientific approach to writing that mirrors the sensibilities of scientists and engineers an approach based on an easily discernable set of principles Rather than merely stating rules for English grammar and composition this book explains the reasons behind these rules and shows that good reasons can guide every writing decision This resource is also well suited for the growing number of scientists and engineers in the U S and elsewhere who speak English as a second language as well as for anyone else who just wants to be understood

The Routledge Handbook of Scientific Communication Cristina Hanganu-Bresch,Michael J. Zerbe,Gabriel Cutrufello,Stefania M. Maci,2021-12-20 Given current science related crises facing the world such as climate change the targeting and manipulation of DNA GMO foods and vaccine denial the way in which we communicate science matters is vital for current and future generations of scientists and publics The Routledge Handbook of Scientific Communication scrutinizes what we value prioritize and grapple with in science as highlighted by the rhetorical choices of scientists students educators science gatekeepers and lay commentators Drawing on contributions from leading thinkers in the field this volume explores some of the most pressing questions in this growing field of study including How do issues such as ethics gender race shifts in the

publishing landscape and English as the lingua franca of science influence scientific communication practices How have scientific genres evolved and adapted to current research and societal needs How have scientific visuals developed in response to technological advances and communication needs How is scientific communication taught to a variety of audiences Offering a critical look at the complex relationships that characterize current scientific communication practices in academia industry government and elsewhere this Handbook will be essential reading for students scholars and professionals involved in the study practice and teaching of scientific medical and technical communication
