Analysis, Design and Construction of Foundations Yung Ming Cheng, Chi Wai Law, Leilei Liu, 2024-05-28 *Analysis Design and Construction of Foundations* covers the key concepts in the analysis and design of foundation systems balancing theory with engineering practice The book examines in depth the methods used for the analysis design and construction of shallow foundations deep foundations excavation and lateral support systems slope stability and stabilization and ground monitoring for proper site management Some new and innovative foundation construction methods are also introduced It is illustrated with case studies of failures and defects from actual construction projects This second edition is extensively revised and developed to include a new chapter on numerical methods in geotechnical engineering as well as a large number of new construction drawings project photos and construction method statements from existing projects to give the book a stronger professional application and connection to engineering practice It also covers some new advanced theoretical concepts not covered in other texts making it useful in both the theoretical and practical aspects It is ideal for senior undergraduates and graduate students academics and consulting geotechnical engineers

[Rock Mechanics & Strata Control](#) A.J.S. (Sam) Spearing, T.R. (Todd Ray) Kostecki, 2025-09-30 *Rock Mechanics Strata Control Theory Practice and Application* serves as a practical guide for examining many of the fundamental and applied aspects of rock mechanics and strata control needed to help ensure safe and effective surface and underground mining Clearly written and comprehensive in scope the book includes numerous worked examples to elaborate on how to interpret and use the rock mechanics and support principles presented It also includes fundamental coverage of major aspects of the topic that students and practitioners would find useful The book is aimed primarily as a teaching and reference book for students in mining engineering and other associated disciplines such as civil engineering geotechnical and geological engineering and geology It would also be useful for practitioners working in the industry as a reference showing numerous practical application examples Focuses on rock mechanics and strata control from a green and sustainable point of view Includes numerous examples and case studies showing how to apply concepts and formula

Principles of foundation engineering Braja M. DAS, 1984 **Using the Engineering Literature** Bonnie A. Osif, 2016-04-19 With the encroachment of the Internet into nearly all aspects of work and life it seems as though information is everywhere However there is information and then there is correct appropriate and timely information While we might love being able to turn to Wikipedia for encyclopedia like information or search Google for the thousands of links [Databases for Data-Centric Geotechnics](#) Kok-Kwang Phoon, Chong Tang, 2024-12-20 *Databases for Data Centric Geotechnics* forms a definitive reference and guide to databases in geotechnical and rock engineering to enhance

decision making in geotechnical practice using data driven methods This first volume pertains to site characterization The opening chapter presents an in depth analysis of site data attributes including the establishment of a new taxonomy of site data under 4S site generalizations spatial features sampling characteristics and smart data to provide a novel agenda for data driven site characterization Type 3 machine learning methods disruptive value are possible as sensors become more pervasive and more intelligent A comprehensive overview of site characterization information is also presented with a focus on its availability coverage value to decision making and challenges The remaining 13 chapters cover databases of soil and rock properties and the application of these databases to rock socket behavior rock classification settlement on soft marine clays permeability of fine grained soils and liquefaction among others The databases were compiled from studies undertaken in many countries including Austria Australia Brazil Canada China France Finland Germany India Iran Japan Korea Malaysia Mexico New Zealand Norway Singapore Sweden Thailand the United Kingdom and the United States This volume on site characterization is a companion to the volume on geotechnical structures Databases for Data Centric Geotechnics represents the most diverse and comprehensive assembly of database research in a single publication consisting of two volumes to date It follows from Model Uncertainties for Foundation Design also published by CRC Press and suits specialist geotechnical engineers researchers and graduate students

Geotechnics for Natural and Engineered Sustainable Technologies A. Murali Krishna, Arindam Dey, S Sreedeeep, 2018-03-01 This contributed volume encompasses contributions by eminent researchers in the field of geotechnical engineering The chapters of this book are based on the keynote and sub theme lectures delivered at the Indian Geotechnical Conference 2017 The book provides a comprehensive overview of the current state of the art research and practices in different domains of geotechnical engineering in the areas of soil dynamics earth retaining structures ground improvement and geotechnical and geophysical investigations It will serve as an ideal resource for academics researchers practicing professionals and students alike
