**Advances in Computer Science and Ubiquitous Computing** Ji Su Park, David Camacho, Stefanos Gritzalis, James J. Park, 2025-05-14 This book presents the combined proceedings of the 16th International Conference on Computer Science and its Applications CSA 2024 in Pattaya Thailand December 18 20 2024 The aim of this meeting was to promote discussion and interaction among academics researchers and professionals in the field of ubiquitous computing technologies and computer science and its applications These proceedings reflect the state of the art in the development of computational methods involving theory algorithms numerical simulation error and uncertainty analysis and novel applications of new processing techniques in engineering science and other disciplines related to ubiquitous computing

**New Kindergarten Architecture** Jure Kotnik, 2011-12-16 A comprehensive design section in this book sets out the parameters and technical properties in kindergarten design as well as introducing components and functional considerations It contains a selection of 26 kindergarten case studies each a successful rendering of the qualities that create ideal spaces for children combined with innovative architectural practices spaces which are safe and calming while at the same time capable of stimulating a child's interest with materials that absorb noise as well as cushioning the inevitable fall With attractive full colour photographs and in depth explanations this is a unique and inspiring resource for designers and students alike

**Indoor Thermal Comfort Perception** Kristian Fabbri, 2015-06-30 Providing a methodology for evaluating indoor thermal comfort with a focus on children this book presents an in depth examination of children's perceptions of comfort Divided into two sections it first presents a history of thermal comfort the human body and environmental parameters common thermal comfort indexes and guidelines for creating questionnaires to assess children's perceptions of indoor thermal comfort It then describes their understanding of the concepts of comfort and energy and the factors that influence that perception In this context it takes into account the psychological and pedagogical aspects of thermal comfort judgment as well as architectural and environmental characteristics and equips readers with the knowledge needed to effectively

investigate children's perspectives on environmental ergonomics. The research field of indoor thermal comfort adopts on the one hand physical parameter measurements and comfort indexes e.g. Predicted Mean Vote (PMV) or adaptive comfort and on the other an ergonomic assessment in the form of questionnaires. However, the latter can offer only limited insights into the issue of comfort as children often use different terms than adults to convey their experience of thermal comfort. The book aims to address this lack of understanding with regard to children's perceptions of indoor thermal comfort. The book is intended for HVAC engineers and researchers, architects and researchers interested in thermal comfort and the built environment. It also provides a useful resource for environmental psychologists, medical and cognitive researchers.

Thermal Comfort Perception Kristian Fabbri, 2024-02-28. This book offers a comprehensive exploration of children's understanding and experiences of thermal comfort. The book provides a methodology for evaluating comfort that takes into account the unique perspectives of children. The first part of the book provides an overview of the history of thermal comfort, the human body and environmental parameters and common thermal comfort indexes. It also offers guidelines for creating questionnaires that accurately assess children's perceptions of indoor thermal comfort. The book then delves into children's understanding of the concepts of comfort and energy as well as the factors that influence their perception of these concepts. It addresses the psychological and pedagogical aspects of thermal comfort judgment as well as the architectural and environmental characteristics that contribute to children's perceptions of comfort. First published as *Indoor Thermal Comfort Perception*, this updated edition also includes new sections on architecture and sensitivity, exploring the impact of classroom spaces on learning and outdoor education and thermal comfort outdoors based on qualitative research. These additions provide valuable insights for future studies on these topics. While physical parameter measurements and comfort indexes are useful in thermal comfort, the book emphasizes the importance of ergonomic assessments in the form of questionnaires, which offer unique insights into children's experiences. The book fills a critical gap in understanding children's perceptions of thermal comfort and is essential reading for HVAC engineers, architects, environmental psychologists and researchers in the medical and cognitive fields.

**Kindergarten Architecture** Jure Kotnik, 2014. GUIDELINES: a comprehensive design section sets out the parameters and technical considerations in kindergarten design as well as introducing components and functional considerations. CASE STUDIES: a selection of 37 kindergartens, each a successful rendering of the qualities that create ideal spaces for children, combined with innovative architectural practices, spaces which are safe and calming while at the same time capable of stimulating a child's interest with materials that absorb noise as well as cushioning the inevitable fall. With attractive full color photographs and in depth explanations, this is a unique and inspiring resource for designers and students alike. Links Books.
