## **K M Bangar :**

THE ARCHITECT OF OUR UNIVERSE JAGJIT SINGH RAWAT,2020-03-11 There was only a space which was cold smooth continuous infinite eternal and without boundary and any visible matter and energy before creation of our early Universe However this space may not have been empty It was perhaps the Dark Matter particle which popped up from this space And due to its intrinsic properties it converted itself into a Supersymmetrical Superparticle that generated Supergravity by the pressures of forces of moving particles and thus into an infinitesimally small dense primordial non transparent opaque plasma fireball This particle first designed the fertile sites due to its own strong gravitational attractive field in which all galaxies stars and planets in different regions of the Universe including our own Milky Way galaxy that contains our Solar System with the eight planets including Earth originated after the collapse of the normal particles With passage of time the great fertile sites were generated on the Earth by tectonics in which sedimentary rocks containing petroleum deposits at depths overlain by great alluvial plains were generated for the evolution and development of living beings including humans and practicing agriculture establishing industries constructing civil facilities and a multitude of other things for the survival of humans **WHERE WHEN AND HOW ANCESTRAL (LUCA) TO ALL LIFE ORIGINATED** Jagjit Singh

Rawat,2021-12-06 The book is all about the living beings All living beings including humans have originated and evolved from the Last Universal Common Ancestor LUCA that was possible as a result of spontaneous step by step chemical origin in about 3 750 billion years ago from the elements consisting of life body such as nitrogen bases adenine thymine cytosine guanine and uracil which are made up off the elements C H O N and ribose sugar This life originated in the sediments of the palaeo floodplains at the palaeo mouths of fresh water flows rivers on the Hadean surface in the Archaean Eon This was a global phenomenon The life on the rocky planet like our Earth was possible because of existence of fresh water bodies over minerals metals and clay deposits which rested on Hadean surface and active geological processes and active environments The book also makes an attempt to explain as to how do the simple elements like C H O N S and P first change to simple chemistry H<sub>2</sub> O NH<sub>3</sub> followed by CH<sub>4</sub> HCN and monomers monosaccharides amino acids glycerol s fatty acids nucleotides and polymers carbohydrates proteins lipids and nucleic acids There was not much development for about 3210 million years from 3750 million years to 540 million years and suddenly changed jumped to complex life forms in about 541 million years ago Here the life originated and evolved without head and heart from 3750 million years ago to 522 million years ago i e for about 3228 million years The head was originated and evolved in about 521million years ago However consciousness emerged along with bonding of carbon with hydrogen and other elements which were finally converted into nucleosides having nitrogenous base and ribose sugar The gravity and gravitational force intertwined with electromagnetic force were the reason there were bonding of carbon and hydrogen and other elements to originate and evolve LUCA which stayed away from thermodynamic equilibrium Introduction to Geology: India's Geological Wonders Siva Prasad Bose,2025-02-18 India
