Proceedings of the 1998 Winter Simulation Conference D. J. Medeiros, 1998      Decision Making and Operations Research Techniques for Construction Management C. M. TAM, Thomas K. L. TONG, H. ZHANG, 2007-06-01 This book provides scientific tools for practitioners to resolve some practical problems which are administered empirically at present and may lead to inconsistent results and human errors The modern decision making tools introduced in this book include Multi criteria Decision making Models Artificial Neural Network Genetic Algorithms Construction Simulation Rough Set Theory and Advanced Statistical Techniques for construction Published by City University of Hong Kong Press

*Fundamentals of Performance Evaluation of Computer and Telecommunication Systems* Mohammed S. Obaidat, Nouredine A. Boudriga, 2010-01-26 The only singular all encompassing textbook on state of the art technical performance evaluation *Fundamentals of Performance Evaluation of Computer and Telecommunication Systems* uniquely presents all techniques of performance evaluation of computers systems communication networks and telecommunications in a balanced manner Written by the renowned Professor Mohammad S Obaidat and his coauthor Professor Nouredine Boudriga it is also the only resource to treat computer and telecommunication systems as inseparable issues The authors explain the basic concepts of performance evaluation applications performance evaluation metrics workload types benchmarking and characterization of workload This is followed by a review of the basics of probability theory and then the main techniques for performance evaluation namely measurement simulation and analytic modeling with case studies and examples Contains the practical and applicable knowledge necessary for a successful performance evaluation in a balanced approach Reviews measurement tools benchmark programs design of experiments traffic models basics of queueing theory and operational and mean value analysis Covers the techniques for validation and verification of simulation as well as random number generation random variate generation and testing with examples Features numerous examples and case studies as well as exercises and problems for use as homework or programming assignments *Fundamentals of Performance Evaluation of Computer and Telecommunication Systems* is an ideal textbook for graduate students in computer science electrical engineering computer engineering and information sciences technology and systems It is also an excellent reference for practicing engineers and scientists

*Handbook of Industrial Engineering* Gavriel Salvendy, 2001-05-25 Unrivalled coverage of a broad spectrum of industrial engineering concepts and applications The *Handbook of Industrial Engineering* Third Edition contains a vast array of timely and useful methodologies for achieving increased productivity quality and competitiveness and improving the quality of working life in manufacturing and service industries This astoundingly comprehensive resource also provides a cohesive structure to the discipline of industrial engineering with four major classifications technology performance improvement management management planning and design control and decision making methods Completely updated and expanded to reflect nearly a decade of important developments in the field this

Third Edition features a wealth of new information on project management supply chain management and logistics and systems related to service industries Other important features of this essential reference include More than 1 000 helpful tables graphs figures and formulas Step by step descriptions of hundreds of problem solving methodologies Hundreds of clear easy to follow application examples Contributions from 176 accomplished international professionals with diverse training and affiliations More than 4 000 citations for further reading The Handbook of Industrial Engineering Third Edition is an immensely useful one stop resource for industrial engineers and technical support personnel in corporations of any size continuous process and discrete part manufacturing industries and all types of service industries from healthcare to hospitality from retailing to finance Of related interest HANDBOOK OF HUMAN FACTORS AND ERGONOMICS Second Edition Edited by Gavriel Salvendy 0 471 11690 4 2 165 pages 60 chapters A comprehensive guide that contains practical knowledge and technical background on virtually all aspects of physical cognitive and social ergonomics As such it can be a valuable source of information for any individual or organization committed to providing competitive high quality products and safe productive work environments John F Smith Jr Chairman of the Board Chief Executive Officer and President General Motors Corporation From the Foreword *Handbook of Simulation* Jerry Banks,1998-09-14 The only complete guide to all aspects and uses of simulation from the international leaders in the field There has never been a single definitive source of key information on all facets of discrete event simulation and its applications to major industries The Handbook of Simulation brings together the contributions of leading academics practitioners and software developers to offer authoritative coverage of the principles techniques and uses of discrete event simulation Comprehensive in scope and thorough in approach the Handbook is the one reference on discrete event simulation that every industrial engineer management scientist computer scientist operations manager or operations researcher involved in problem solving should own with an in depth examination of Simulation methodology from experimental design to data analysis and more Recent advances such as object oriented simulation on line simulation and parallel and distributed simulation Applications across a full range of manufacturing and service industries Guidelines for successful simulations and sound simulation project management Simulation software and simulation industry vendors Proceedings of the ... Winter Simulation Conference ,1997 **New Computing Techniques In Physics Research Ii - Proceedings Of The Second International Workshop On Software Engineering Artificial Intelligence And Expert Systems In High Energy And Nuclear Physics** Denis Perret-gallix,1992-09-04 A vivid example of the growing need for frontier physics experiments to make use of frontier technology is in the field of Artificial Intelligence AI and related themes By AI we are referring here to the use of computers to deal with complex objects in an environment based on specific rules Symbolic Manipulation to assist groups of developers in the design coding and maintenance of large packages Software Engineering to mimic human reasoning and strategy with knowledge bases to make a diagnosis of equipment Expert Systems or to implement a model of the brain to solve pattern recognition problems Neural

Networks These techniques developed some time ago by AI researchers are confronted by down to earth problems arising in high energy and nuclear physics However similar situations exist in other big sciences such as space research or plasma physics and common solutions can be applied The magnitude and complexity of the experiments on the horizon for the end of the century clearly call for the application of AI techniques Solutions are sought through international collaboration between research and industry
