

ADVANTAGES OF MPFI

- 1) More uniform A/F mixture will be supplied to each cylinder; hence the difference in power developed in each cylinder is minimum. Vibration from the engine equipped with this system is less; due to this the life of engine components is improved.
- (2) No need to crank the engine twice or thrice in case of cold starting as happens in the carburetor system
- (3) Immediate response, in case of sudden acceleration / deceleration.
- (4) Since the engine is controlled by ECM (Engine Control Module), more accurate amount of A/F mixture will be supplied and as a result complete combustion will take place. This leads to effective utilization of fuel supplied and hence low emission level.
- (5) The mileage of the vehicle will be improved.
