AI Applications in Online Higher Education Administration Kathleen S. Ives, Marie Cini, Ray Schroeder, 2026-03-09 AI is reshaping higher education fast This book brings together faculty instructional designers technologists and academic leaders who are on the front lines of that change Their chapters offer honest reflections practical examples and thoughtful perspectives on how AI is influencing course design assessment student support policy and leadership Rather than hype or fear the contributors offer grounded insight what it takes to integrate AI in ways that are ethical equitable and truly student centered They explore both opportunities and risks with an eye toward long term impact not just short term solutions Whether you re charting an institutional AI strategy or simply trying to understand what s ahead this collection is a timely guide It doesn t treat AI as a magic fix but as a tool one that when used wisely can help higher education become more human not less

Leaders as Architects of Change Sharon M. Ravitch, Raghu Krishnamoorthy, 2026-03-17 Leaders as Architects of Change provides new approaches frames and tools for leaders and their teams to design drive and support cultures of workplace inquiry which create collective capacity and adaptivity and which ground and connect people in times of change Written by scholar practitioners alongside global

business leaders the book explores how organizations can thrive in a brittle anxious nonlinear and incomprehensible BANI world Drawing on evidence based research and real world experience the contributors present practical frameworks for antifragility emotional intelligence adaptive culture and collaborative leadership Through chapters on AI driven disruption organizational resilience dissent by design and trust in virtual teams the book reveals how leaders can design adaptive systems that bend without breaking cultivate psychological safety and unlock human flourishing Rather than offering prescriptive fixes it provides tools to architect conditions for resilience innovation and belonging The book will resonate with executives academics consultants and students of leadership who seek actionable strategies to navigate volatility Readers will gain both insight and courage to reimagine organizations not as machines of control but as living systems of connection adaptability and purpose

Unlocking the Potential of Health Data: Interoperability, Security, and Emerging Challenges in AI, LLM, Precision Medicine, and Their Impact on Healthcare and Research Eugenia Rinaldi, Stefano Dalmiani, Rebecca Kush, 2026-02-16

The recent COVID 19 pandemic has underscored the critical need for efficient data exchange among institutions to effectively respond to health emergencies and combat global health threats While the digitization of data represents a significant advancement over traditional paper based methods it alone falls short when information is siloed in disparate systems worldwide each utilizing incompatible formats The collection of citizens health data is becoming increasingly pervasive through active and passive means including telemedicine wearable devices and health apps Yet to fully leverage the wealth of data amassed enhancing interoperability across systems is imperative Presently the amalgamation of data from diverse systems necessitates laborious and error prone transformation processes hampering data quality and integration By fostering data exchange between research and healthcare domains not only can healthcare delivery be enhanced but collaborative opportunities across institutions can also be nurtured Research stands to gain significantly from access to vast repositories of data facilitating more reliable and expeditious outcomes that can inform healthcare practices The advancement of precision medicine hinges on the availability of extensive high quality data Additionally a higher level of interoperability of health data would enable the possibility to apply central analysis algorithms to networks of hospitals removing the need for local analysis expertise In this context the establishment and adoption of common data models and interoperability standards for the terminology and structure of data is of paramount importance Citizens should be adhering to the FAIR principles findability accessibility interoperability and reusability when collecting or disseminating data serves as a beacon promoting traceability exchange and reuse of information Metadata associated with FAIR data bolster data quality by minimizing ambiguities and streamlining reuse Amidst this pursuit due consideration must be accorded to data protection and security ensuring the safeguarding of sensitive information within this expansive data ecosystem Citizens are at the center of this ecosystem and should be empowered to control their data The potential of digital medicine particularly with the integration of artificial intelligence and large language models LLMs is undeniably exciting

However it also brings with it significant risks if data is not handled with meticulous care and strategies to enhance data quality and mitigate data bias and security risks need to be implemented The areas of interest for this Research Topic concern the management of health data and include but are not limited to Interoperability Data harmonization and standardisation Common data models Bias in health data Health data quality Federated systems for health data analysis Imaging data structure Health data security Artificial intelligence Large language models Precision medicine Health apps
