The AP Exam:

Test Date: Monday, May 13 @ 8:00 a.m. The 2013 exam will be a new format to account for the new curriculum. More information will be provided later.

Course Description:

AP Biology is a rigorous and demanding course, which is the equivalent of an introductory college biology course. Content will be covered in more depth and greater expectations will be placed on interpretation and analysis of information than previous biology courses. In addition, statistical analysis of data and modeling of concepts will be expected. A significant amount of studying must be completed at home to allow time for discussion, labs, and inquiry during class time. The College Board has redesigned the curriculum starting in the 2013 school year, and although the amount of material has been reduced, the emphasis on scientific thinking and analytical thinking has increased. The course will be structured differently this year due to the changes and to allow for more class time for labs and discussions. The new AP Biology curriculum encompasses 4 'big ideas', with Essential Knowledge and Process Skills that support each one.

Big Idea 1: Evolution – the process of evolution drives the diversity and unity of life

Big Idea 2: Cellular Processes (Energy and Communication) – Biological systems utilize free energy and molecular building blocks to grow.

Big Idea 3: Genetics and Information Transfer – living systems store, retrieve, transmit, and respond to information essential to life processes

Big Idea 4: Interactions – Biological systems interact and these systems and their interactions possess complex properties.
