Impact Assessment and Project Appraisal ,2000 **Prentice Hall Science Explorer: Teacher's ed** ,2005 Missouri Environmental Law and Policy Review ,2003 **CTE-STEM 2022 conference proceedings** Marcus Specht,Xiaoling Zhang,Christian Glahn,Nardie Fanchamps,2022-08-15 The 6th APSCE International Conference on Computational Thinking and STEM Education 2022 CTE STEM 2022 is organized by the Asia Pacific Society for Computers in Education APSCE and hosted by the Leiden Delft Erasmus Centre for Education and Learning LDE CEL CTE STEM 2022 is hosted for the first time in Europe by the Delft University of Technology TU Delft Delft the Netherlands This conference continues from the success of the previous four international Computational Thinking conferences organized by the National Institute of Education and Nanyang Technological University NIE NTU This conference invites CT as well as STEM researchers and practitioners to share their findings processes and outcomes in the context of computing education or computational thinking **Federal Register** ,1993-01-04 **Fortress Conservation and International Accountability for Human Rights Violations against Batwa in Kahuzi-Biega National Park** Colin Luoma,2022-05-05 The Kahuzi Biega National Park PNKB in the Democratic Republic of the Congo presents an existential threat to the indigenous Batwa people For millennia Batwa occupied the forests surrounding Mount Kahuzi and Mount Biega utilizing traditional ecological knowledge and sustainable practices to foster one of the most biodiverse places on the planet The creation of the PNKB in the 1970s forced Batwa from their ancestral lands rendering them deeply impoverished landless dependent and culturally disconnected When they seek to return home and access their lands and resources they are subjected to extreme violence by park authorities who treat them as trespassers poachers and enemies of conservation This report situates the serious human rights violations suffered by Batwa in the PNKB within the broader global phenomenon of fortress conservation and analyses the respective roles and accountability of the park s core international partners Ongoing violence against Batwa in the PNKB is a stark reminder of the immense human and environmental costs associated with pursuing conservation policies that prevent indigenous peoples from owning governing accessing and benefiting from their territories and resources These policies are bolstered by donors global NGOs and international organizations which enable and tacitly uphold a violent and anti indigenous status quo in the PNKB and other protected areas Donors conservation organizations and other international partners of the PNKB have failed to adequately ensure that their support did not contribute to human rights violations committed against Batwa These international partners had explicit knowledge of unresolved human rights abuses committed by ecoguards as well as threats of imminent violence against Batwa communities living inside the park Yet they continued to equip fund and train ecoguards and actively promoted the increasing militarization of the PNKB This militarization has resulted in overly aggressive policing and military style actions by ecoguards often jointly with the Congolese Army who explicitly target criminalize and brutalize Batwa At the same time the park consistently fails to meet environmental expectations and objectives Thus the PNKB

represents a clear case of how fortress conservation fails both people and the environment. Regrettably, it is not an isolated example of flawed conservation policy. Instead, it is indicative of the institutional shortcomings and systemic failures inherent in the dominant ways in which conservation is pursued by states and promoted by international conservation actors in the Congo Basin and in other parts of the world.

Tourism and Animal Ethics David A. Fennell, 2024-02-26. This timely book provides a critical account of the role that animals play in the tourism industry, representing an extension of the sustainability imperative and environmental theory. Written by a leading academic and author, this volume explores the rich history of animal ethics research both inside and outside of tourism studies for the purpose of providing greater theoretical, empirical, conceptual, and practical guidance. It examines historical and current practices of the use of animals in the tourism industry from both in situ to ex situ consumption and production perspectives, identifying a range of ethical issues associated with such use. This second edition has been updated to reflect contemporary research and thinking around animal welfare, hunting, and consumption, with new chapters on animals as food and policy at the national and international levels. New case studies have been integrated throughout. Offering an interdisciplinary overview of the moral issues related to the use of animals in tourism through cutting-edge research, this book is essential reading for students, academics, and researchers interested in tourism ethics, sustainable tourism, and wildlife tourism.
