Shaping the Future of Power Lina Benabdallah, 2020-07-20 China s rise to power is one of the biggest questions in International Relations theory IRT and foreign policy circles Although power has been a core concept of IRT for a long time the faces and mechanisms of power as it relates to Chinese foreign policymaking has changed the contours of that debate The rise of China and other powers across the global political arena sparks a new visibility for different kinds of encounters between states particularly between China and other Global South states These encounters are more visible to IR scholars because of the increasing influence that rising powers have in the international system This book shows that foreign policy encounters between rising powers and Global South states do not necessarily exhibit the same logics behaviors or investment strategies of Euro American hegemons Instead they have distinctive features that require new theoretical frameworks for analysis *Shaping the Future of Power* probes the types of power mechanisms that build diffuse

and project China's power in Africa. One must take into account the processes of knowledge production, social capital formation and skills transfers that Chinese foreign policy directs toward African states to fully understand China's power building mechanisms. The relational power framework requires these elements to capture both the material aspects and ideational, people-centered aspects to power. By examining China's investments in human resource development programs for Africa, the book reveals a vital yet undertheorized aspect of China's foreign policy making.

Social Policy in a Developing World Rebecca Surender, Robert Walker, 2013-01-01. This volume makes a valuable contribution to the dynamic and expanding field of scholarship on social policy in developing countries. In combining analytical frameworks used in comparative social policy analysis with an examination of key areas of policy and provision in selected countries, it will be a key resource for anyone interested in current debates in international social policy and welfare.

Nicola Yeates, Open University, UK. There is increasing interest in the significance of social policy in the management of welfare and risk in the developing world. This volume provides a critical analysis of the challenges and opportunities facing social protection systems in the global south and examines current strategies for addressing poverty and welfare needs in the region. In particular, the text explores the extent to which the analytic models and concepts for the study of social policy in the industrialised North are relevant in a developing country context. The volume analyses the various institutions, actors, instruments and mechanisms involved in the welfare arrangements of developing countries and provides a study of the contexts, development and future trajectory of social policy in the global South. The book's comparative and interdisciplinary approach will be of interest to anyone involved in social policy research and analysis and current welfare debates.
