- Markets best thought of as human constructions, not elements of natural order
- Goods exchanged in economic markets are called **private**
  - o The "owner" has full control over their use
  - o Owner can exclude others from its use
- Private goods defined by two properties:
  - o *Excludability*
    - Owner may exclude others from using the good
  - o *Solitary supply*
    - Uses deplete availability of the good
- Goods that lack these two properties are called *public goods*
  - o Nonexcludable, so anybody can use them whether they paid for it or not
  - o Jointly supplied, one's use does not diminish the supply to others
    - National defense, lighthouse services
- Some goods are jointly supplied, but excludable

## ***Public Goods and Politics***

## **Shepsle Analyzing Politics Chapter Summaries:**

Imagining Politics Stephen Benedict Dyson, 2019-07-09 *Imagining Politics* critically examines two interpretations of government. The first comes from pop culture fictions about politics; the second from academic political science. Stephen Benedict Dyson argues that televised political fictions and political science theories are attempts at meaning-making, reflecting and shaping how a society thinks about its politics. By taking fiction seriously and by arguing that political science theory is homologous to fiction, the book offers a fresh perspective on both. Using fictions such as *The West Wing*, *House of Cards*, *Borgen*, *Black Mirror*, and *Scandal* to challenge the assumptions that construct the discipline of political science itself, *Imagining Politics* is also about a political moment in the West. Two great political shocks, Brexit and the election of Donald Trump, are set in a new context here. Dyson traces how Brexit and Trump campaigned against our image of politics as usual and won.

*Beyond Post-communist Studies* Terry D. Clark, 2016-07-08 This book makes the case that several East Central European countries have emerged as fully consolidated democracies. As such, they may be integrated into the mainstream of political science research and not consigned forever to a transitional category encompassing countries that are now fully democracies as well as some that are not democratic at all. The author outlines the steps of another transition from post-communist studies to political science research. He demonstrates how institutionalist or rational choice theories can be applied to the analysis of political processes in the successfully democratized countries and proposes a new research agenda for political scientists studying the region. The results of this work can enrich political science as well as our understanding of both democracy and the politics of contemporary Eastern Europe.

**Misreading Law, Misreading Democracy** Victoria Nourse, 2016-09-26 Victoria Nourse argues that lawyers must be educated on the basic procedures that define how Congress operates today. Lawmaking creates winners and losers. If lawyers and judges do not understand this, they may embrace the meanings of those who opposed legislation, turning legislative losers into judicial winners and standing democracy on its head.

**Death by a Thousand Cuts** Matt Qvortrup, 2021-06-21 Putting the current crisis of democracy into historical perspective, *Death by a Thousand Cuts* chronicles how despots, dictators, and outright tyrants have finessed the techniques of killing democracies earlier in history in the 20th Century and how today's autocrats increasingly continue to do so in the 21st. It shows how autocratic government becomes a kleptocracy sustained only to enrich the ruler and his immediate family. But the book also addresses the problems of being a dictator and considers if dictatorships are successful in delivering public policies and finally how autocracies break down. We tend to think of democratic breakdowns as dramatic events such as General Pinochet's violent coup in Chile or Generalissimo Franco's overthrow of the Spanish Republic. But this is not how democracies tend to die: only five percent of democracies end like this. Most often, popular government is brought down gradually, almost imperceptibly. Based in part on Professor Qvortrup's BBC Programme *Death by a Thousand Cuts* (Radio 4, 2019), the book shows how complacency is the greatest danger for the survival of government by the people. Recently

democratically elected politicians have used crises as a pretext for dismantling democracy They follow a pattern we have seen in all democracies since the dawn of civilisation The methods used by Octavian in the dying days of the Roman Republic were almost identical to those used by Hungarian strongman Viktor Orb n in 2020 And sadly there are no signs that the current malaise will go away Death by a Thousand Cuts adds substance to a much discussed topic the threat to democracy It provides evidence and historical context like no other book on the market Written in an accessible style with vignettes as well as new empirical data the books promises to be the defining book on the topic This book will help readers who are concerned about the longevity of democracy understand when and why democracy is in danger of collapsing and alert them to the warning signs of its demise

Negotiations in the World Trade Organization Michal Parizek,2019-10-10 This book examines the World Trade Organization WTO in the context of the global economy in the twenty first century arguing that many problems within the institution lie in the disparity between its design and the nature of its tasks Studying the global trade regime and the unsuccessful Doha round of trade liberalization negotiations this volume suggests that important institutional adjustments may be necessary for the WTO and other major international institutions to re gain their ability to manage global economy It uses extensive new qualitative and quantitative evidence to identify systematic dysfunctions in how the Doha negotiations have been conducted and links these dysfunctions to the exclusively inter governmental design of interest representation in the WTO Based on this the book argues that global economic institutions should consider allowing broader parliamentary and non state representation of their members Presenting findings which can also be applied to other global economic institutions Negotiations in the World Trade Organization will be useful to students and scholars of international trade global governance and international political economy

**Ending Welfare as We Know it** R. Kent Weaver, 2000 Bill Clinton's first presidential term was a period of extraordinary change in policy toward low income families In 1993 Congress enacted a major expansion of the Earned Income Tax Credit for low income working families In 1996 Congress passed and the president signed the Personal Responsibility and Work Opportunity Reconciliation Act This legislation abolished the sixty year old Aid to Families with Dependent Children AFDC program and replaced it with a block grant program Temporary Assistance for Needy Families It contained stiff new work requirements and limits on the length of time people could receive welfare benefits Dramatic change in AFDC was also occurring piecemeal in the states during these years States used waivers granted by the federal Department of Health and Human Services to experiment with a variety of welfare strategies including denial of additional benefits for children born or conceived while a mother received AFDC work requirements and time limits on receipt of cash benefits The pace of change at the state level accelerated after the 1996 federal welfare reform legislation gave states increased leeway to design their programs Ending Welfare as We Know It analyzes how these changes in the AFDC program came about In fourteen chapters R Kent Weaver addresses three sets of questions about the politics of welfare reform the dismal history of comprehensive

AFDC reform initiatives the dramatic changes in the welfare reform agenda over the past thirty years and the reasons why comprehensive welfare reform at the national level succeeded in 1996 after failing in 1995 in 1993 94 and on many previous occasions Welfare reform raises issues of race class and sex that are as difficult and divisive as any in American politics While broad social and political trends helped to create a historic opening for welfare reform in the late 1990s dramatic legislation was not inevitable The interaction of contextual factors with short term political and policy calculations by President Clinton and congressional Republicans along with the cascade of repositioning by other policymakers turned ending welfare as we know it from political possibility into policy reality *Cultivating Congress* William Paul Browne,1995 The American Congress in the mid 1990s remains the object of voter discontent Public outcries against special interests and unresponsive incumbents have amplified an already pervasive scepticism towards Beltway politics The book covers policy towards agricultural issues in particular *Growth and Variability in State Tax Revenue* Randall G. Holcombe,Russell S. Sobel,1997-10-28 During recessions state government fiscal crises are widespread as states find their revenues inadequate to meet their expenditure demands This volume shows that state fiscal crises have only one significant cause revenue downturns associated with recessions Other analysts have argued that fiscal crises are the result of an interaction of many complex causes including inadequate tax bases increasing expenditure demands and limits placed on state governments by voters This analysis examines these other factors and shows that while they present significant challenges to state policymakers they are not the cause of fiscal crises The book presents an improved methodology for measuring cyclical variability of revenues and uses this methodology to show that there is no way to restructure state tax systems in order to appreciably reduce the fiscal stress associated with recessions Fiscal stress can be lessened by setting aside revenues during prosperous years in a rainy day fund but current rainy day funds are not large enough to eliminate the fiscal stress caused by recessions *The Economics of Politics* Dennis C. Mueller,2001 *Cabinets and Coalition Bargaining* Kaare Strøm,Wolfgang C. Müller,Torbjörn Bergman,2008 This analysis of coalition politics in Western Europe is based on the most comprehensive data set ever employed in coalition studies exploring both coalitional and single party countries and governments **Journal of Economic Literature** ,1992 **Political Economy Models and Agricultural Policy Formation** Frans A. van der Zee,1997 The annual price review is taken as an example
