

Story Structure Elements

A story told with the five story elements results in a fully formed narrative. While a story with these elements may be very short, it will feel and sound complete. In fact, more complex stories generally contain a repetition of the second and third structures (complication and action). Thus, this model fits most stories, both simple and complex.

When children develop skills centering on the foundational parts of a story, they learn how a story is organized. Such story work results in increased comprehension and improved story grammar. This story framework also helps children grow as storytellers. Whether they are retelling a favorite book or writing a story of their own, they will develop a communication framework that will serve them throughout life.

1. Orientation Character & Situation

3. Action Steps Taken

4. Resolution Victory!

5. Ending Wrap-up

The contributors to this book who include several practising teachers argue that children should be taught how to write in

develop their teaching of writing to realise the full potential of the process approach and at the same time maintain its
