Touch The Science Of Hand Heart And Mind David J Linden

Ben Channon

Touch The Science Of Hand Heart And Mind David J Linden:

Touch David Linden,2015-01 Why can t we tickle ourselves Why do footballers who hug score more goals Why does holding a hot coffee make us feel more positively about people Touch is the sense that make us human It defines our experiences shapes our sense of self and bonds us together This riveting book from acclaimed neuroscientist David J Linden is full of revelations about the biology and psychology of touch It will make you see the world differently and feel the world differently too

Touch David J. Linden,2016-01-26 The New York Times bestselling author of The Compass of Pleasure examines how our sense of touch is interconnected with our emotions Dual function receptors in our skin make mint feel cool and chili peppers hot

Happy by Design Ben Channon,2019-07-15 Can good design truly make us happier Given that we spend over 80% of our time in buildings shouldn t we have a better understanding of how they make us feel This book explores the ways in which buildings spaces and cities affect our moods It reveals how architecture and design can make us happy and support mental health and explains how poor design can have the opposite effect Presented through a series of easy to understand design tips and accompanied by beautiful diagrams and illustrations Happy by Design is a fantastic resource for architects designers and students or for anybody who would like to better understand the relationship between buildings and happiness

The Kindness Cure Tara Cousineau,2018-02-02 It s time for a kindness revolution In The Kindness Cure psychologist Tara Cousineau draws on cutting edge research in psychology and neuroscience to show how simple practices of kindness for ourselves for others and for our world can dissolve our feelings of fear and indifference and open us up to a life of profound happiness Compassion for ourselves and others is our birthright as humans hardwired into our DNA and essential to our happiness But in our fast paced technical savvy and hyper competitive world it may come as no surprise that rates of narcissism have risen while empathy levels have declined We now find ourselves in a cool to be cruel culture where it s easy to feel disillusioned and dejected in our hearts homes and communities So how can we reverse this malady of meanness and make kindness and compassion an imperative The Kindness Cure draws on the latest social and scientific research to reveal how the seemingly soft skills of kindness cooperation and generosity are fundamental to our survival as a species In fact it s our prosocial abilities that put us at the head of the line Blended with moving case studies and clinical anecdotes Cousineau offers practical ways to rekindle kindness from the inside out We are wired to care The very existence of our human species evolved because of an intricate physiology built for empathy compassion and cooperation Yet we have an epidemic of loneliness indifference and cruelty and we see these destructive trends on a daily basis in our families schools neighborhoods and workplaces This important book teaches effective skills in compassion mindfulness and social and emotional learning and reveals successful social policy initiatives in empathy taking place that inform everything from family life to education to the workplace Kindness has the exponential power to renew relationships and transform how we think feel and behave in the world Will you be a part of the revolution

On Running and Becoming Human Thomas

F. Carter, 2018-04-10 How does the simple act of running make us human As a form of enskilled movement that shapes how we perceive our surroundings running enacts a mindful bodily engagement with the world an engagement that generates our very minds through perceptual learning Thomas F Carter examines the interrelated aspects of a runner's being mind body and environs to illustrate that the skillful act of locomotion is one of principle ways that we as human beings become integral parts of the larger world Synthesizing recent developments in neuroscience anthropology and philosophy of mind On Running proves there is more to running than merely clocking up the miles
