Toyo Ito Toyo Ito,2006      **Toyo Ito** Toyoo Itō,Riken Yamamoto,Dana Buntrock,Tarō Igarashi,2009-07-11 Toyo Ito b 1941 is one of the most important Japanese architects working today and has grown to be one of the most influential in the world He is famous for ambitious and stunning projects such as the Sendai Mediatheque TOD S Omotesando Tama Art University Library and Island City Central Park all of which demonstrate his ability to use materials in surprising and innovative ways with revolutionary high tech organic geometries In this unique volume Toyo Ito presents a personal selection of 31 of his projects divided into 14 thematic sections all with introductions in which Ito looks at some of the influences on and trends in his thought The eminent architect Riken Yamamoto provides an introduction while the internationally respected architecture critics Dana Buntrock and Taro Igarashi contribute exploratory essays      *New Glass Architecture* Brent Richards,2006 Much of modern architecture has been conceived using glass to create minimal structures This book begins with an introduction that traces the history of glass in architecture and also describes the developments in glass technology It also features specially commissioned photographs by the renowned architectural photographer Dennis Gilbert      *Toyo Ito* Sophie Roulet,Sophie Soulié,1991      *Toyo Ito* Toyo Ito,1994 Uitgave over het werk van de in Zuid Korea geboren 1941 Japanse architect met interview en biografie      Contemporary Japanese Architecture James Steele,2017-03-16 Contemporary Japanese Architecture presents a clear and comprehensive overview of the historical and cultural framework that informs the work of all Japanese architects as an introduction to an in depth investigation of the challenges now occupying the contemporary designers who will be the leaders of the next generation It separates out the young generation of Japanese architects from the crowded distinguished multi generational field they seek to join and investigates the topics that absorb them and the critical issues they face within the new economic reality of Japan and a shifting global order Salient points in the text are illustrated by beautiful descriptive images provided by the architects and from the extensive collection of the author By combining illustrations with timelines and graphics to explain complex ideas the book is accessible to any student seeking to understand contemporary Japanese architecture      **Toyo Ito made in Italy** Toyoo Ito,2005      **Toyo Ito** Toyoo Itō,2001      Contemporary Perspectives on Architectural Organicism Gary Huafan He,Skender Luarasi,2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism s infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo

ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

**Allegories of Time and Space** Jonathan M. Reynolds, 2015-02-28 *Allegories of Time and Space* explores efforts by leading photographers artists architects and commercial designers to re envision Japanese cultural identity during the turbulent years between the Asia Pacific War and the bursting of the economic bubble in the 1990s This search for a cultural home was a matter of broad public concern and each of the artists under consideration engaged a wide audience through mass media The artists under study had in common the necessity to establish distance from their immediate surroundings temporally or geographically in order to gain some perspective on Japan s rapidly changing society They shared what Jonathan Reynolds calls an allegorical vision a capacity to make time and space malleable to see the present in the past and to find an irreducible cultural center at Japan s geographical periphery The book commences with an examination of the work of Hamaya Hiroshi A Tokyo native Hamaya began to photograph the isolated snow country of northeastern Japan in the midst of the war His empathetic images of village life expressed an aching nostalgia for the rural past widely shared by urban Japanese Following a similar strategy in his search for authentic Japan was the photographer T matsu Sh mei Although T matsu originally traveled to Okinawa Prefecture in 1969 to document the destructive impact of U S military bases in the region in his characteristically edgy style he came to believe that Okinawa was still in some sense more truly Japanese than the Japanese main islands The self styled iconoclast artist Okamoto Tar emphatically rejected the delicacy and refinement conventionally associated with Japanese art in favor of the hyper modern qualities of the dynamic and brutal aesthetics that he saw expressed on the ceramics of the prehistoric J mon period One who quickly recognized the potential in Okamoto s embrace of Japan s ancient past was the architect Tange Kenz As a point of comparison Reynolds looks at the portrayal of the ancient Shint shrine complex at Ise in a volume produced in collaboration with the photographer Watanabe Yoshio Reynolds shows how this landmark book contributed significantly to a transformation in the meaning of Ise Shrine by suppressing the shrine s status as an ultranationalist symbol and re presenting the shrine architecture as design consistent with rigorous modernist aesthetics In

the 1970s and 1980s there circulated widely through advertising posters of the designer Ishioka Eiko the ephemeral nomadic architecture of It Toyo o TV documentaries and other media a fantasy that imagined Tokyo s young female office workers as urban nomads These cosmopolitan dreams may seem untethered from their Japanese cultural context but Reynolds reveals that there were threads linking the urban nomad with earlier efforts to situate contemporary Japanese cultural identity in time and space In its fresh and nuanced re reading of the multiplicities of Japanese tradition during a tumultuous and transformative period Allegories of Time and Space offers a compelling argument that the work of these artists enhanced efforts to redefine tradition in contemporary terms and by doing so promoted a future that would be both modern and uniquely Japanese

Franck,2016-03-07 The traditional veneration of architecture for its monumental and enduring qualities seems to be changing Architects and other designers are moving away from seeking permanence towards a more open creative use of what time has to offer This is revealed in new approaches to historic preservation the proliferation of temporary structures concerns regarding sustainability and the employment of time efficient processes Architecture Timed explores the role of ideas about time in the design inclinations and choices of contemporary designers of the environment Contributors consider how the new can be incorporated into the old how designing for the very short term has significant advantages how what is temporary can be re used and how the design of materials buildings and landscapes can improve sustainability and enhance experiences of time passing Many designers have replaced the ideal of timelessness and the view of time as a series of singular static moments with an enriched and more nuanced perspective treating time as a source of inspiration to be embraced not a condition to be defended against Contributors include Juhani Pallasmaa Brian McGrath Federica Goffi Jill Stoner Richard Garber and Eric Parry Designers featured include Agence Ter Shigeru Ban BanG Studio Diller Scofidio Renfro EMF Landscape Architects Gluck GRO Architects Interboro Partners Toyo Ito Kengo Kuma Enric Miralles Eric Parry Architects Carlo Scarpa Taylor Cullity Lethlean UNStudio and Peter Zumthor

*Toyo Ito* Toyoo Itō,2001 **Feature: Toyo Ito - Architecture and Place** Nobuyuki Yoshida,2010 *Toyo Ito* Toyoo Itō,2002-07-04 The Architectural Documents series sees the publication of the first monograph on one of the most extraordinary figures on the contemporary architectural scene Toyo Ito of Japan b 1941 Since the 1970s Ito has been carrying out research into building materials light and space research which has led him to design buildings that he himself has defined as non material aerial structures fluid and permeable spaces which avoid rigid compositional geometries Over

the years Ito has gradually simplified his language and his work the structure of which has increasingly lost importance can be studied as a series of variations on the layering of the facade His obsession with lightness and transparency are expressed to the full in the most important work of his creative career the Sendai Mediatheque 1995 2001 This book with an exceptional body of illustrations presents the Japanese architects most significant projects starting with the Aluminium House of 1970 1 through to the most recent project for the Mahler 4 office block in Amsterdam 2000 1 The appendix includes a complete list of Toyo Ito s works a selection of his writings as well as a biographical summary and up to date bibliography
