**Handbook of the Geographies of Religion** Lily Kong, Orlando Woods, Justin K.H. Tse, 2024-12-02 This international and interdisciplinary handbook offers a comprehensive and an in depth overview of contemporary research theory and practice in the geographies of religion in various parts of the world and with different populations The book showcases the major theoretical interventions in the field and the debates about the existential constitution of sacred space and what this means for secularization It outlines the most significant geographical themes related to these new developments with their implications for how to think about landscapes space bodies and worlds The book also discusses the future of the field especially in the realms of encounters and ethics economies and markets institutions and organisations movements and migrations and media and mediums It also offers views from disciplines outside of geography including from sociology anthropology religious studies and media and communications which demonstrates the contributions of geographers of religion to wider intellectual conversations and debates

*The Origins And Spread Of Agriculture And Pastoralism In Eurasia* David R. Harris, 2024-11-01 As the first book to examine the origins and spread of agriculture and pastoralism in Europe and Asia as a whole this major contribution should be essential reading for archaeologists anthropologists biologists and geographers Adopting a novel approach to the subject the authors examine it first in terms of seven different disciplinary perspectives social ecological genetic linguistic biomolecular epidemiological and geographical Then 20 case studies are presented which are based primarily on archaeological and biological evidence and which relate to three major regions Southwest Asia Europe and Central Asia to the Pacific The book concludes with an overview of Eurasia as a whole The transition from hunting and gathering to agriculture had revolutionary consequences for human society It led to the emergence of urban civilizations and ultimately to humanity's almost complete dependence on relatively few domesticated animals and plants The subject has been much studied but the results have tended to be interpreted largely in terms of local cultural sequences with insufficient comparison made with evidence from other areas In contrast this book provides a continental scale framework with its scope extended to pastoralism because in Eurasia both the raising of livestock and the cultivation of crops were integral components of the agricultural revolution from its inception some 10 000 years ago Comprehensive and authoritative *The Origins and Spread of Agriculture and Pastoralism in Eurasia* should appeal strongly to the wide readership of students and specialists concerned with the prehistoric antecedents of modern civilization
