Unit summary

Mental ill health could be one of the most serious health issues facing the wellbeing of individuals in the UK today.

This unit will give you knowledge of the main forms of mental ill health according to the psychiatric classification system. You will consider the strengths and limitations of this system and look at alternative frameworks for understanding mental distress.

You will learn about the ways that mental ill health can affect the lives of individuals and the people who care for them and explore how it can impact on their lives. This is vital to understanding the wider and sometimes unseen impact of mental ill health. By looking at social factors, such as discrimination and stigma, you will develop a deeper understanding of mental ill health and its consequences. You will also consider the benefits of early intervention in promoting mental health and wellbeing.
