   Variational Regularization for Systems of Inverse Problems Richard Huber,2019-02-14 Tikhonov regularization is a cornerstone technique in solving inverse problems with applications in countless scientific fields Richard Huber discusses a multi parameter Tikhonov approach for systems of inverse problems in order to take advantage of their specific structure Such an approach allows to choose the regularization weights of each subproblem individually with respect to the corresponding noise levels and degrees of ill posedness   *Abstract Algebra and Famous Impossibilities* Sidney A. Morris,Arthur Jones,Kenneth R. Pearson,2022-11-26 This textbook develops the abstract algebra necessary to prove the impossibility of four famous mathematical feats squaring the circle trisecting the angle doubling the cube and solving quintic equations All the relevant concepts about fields are introduced concretely with the geometrical questions providing motivation for the algebraic concepts By focusing on problems that are as easy to approach as they were fiendishly difficult to resolve the authors provide a uniquely accessible introduction to the power of abstraction Beginning with a brief account of the history of these fabled problems the book goes on to present the theory of fields polynomials field extensions and irreducible polynomials Straightedge and compass constructions establish the standards for constructability and offer a glimpse into why squaring doubling and trisecting appeared so tractable to professional and amateur mathematicians alike However the connection between geometry and algebra allows the reader to bypass two millennia of failed geometric attempts arriving at the elegant algebraic conclusion that such constructions are impossible From here focus turns to a challenging problem within algebra itself finding a general formula for solving a quintic polynomial The proof of the impossibility of this task is presented using Abel s original approach Abstract Algebra and Famous Impossibilities illustrates the enormous power of algebraic abstraction by exploring several notable historical triumphs This new edition adds the fourth impossibility solving general quintic equations Students and instructors alike will appreciate the illuminating examples conversational commentary and engaging exercises that accompany each section A first course in linear algebra is assumed along with a basic familiarity with integral calculus   *Calculating Chance: Card and Casino Games* Sidney A. Morris,2024-10-16 This book offers a gentle yet rigorous introduction to probability theory with a special focus on finite probability spaces Drawing inspiration from card games casino games mahjong and two up it also delves into real world applications such as weather forecasting lotteries hereditary diseases and PCR virus testing Discover which casino game gives you the best chance of winning and which one offers the worst odds Assuming only a high school mathematics background this book is an excellent resource for both students and teachers providing clear explanations and engaging examples The technical material is lightened with entertaining stories such as how someone became a millionaire by spotting a flaw in a national lottery and how another person helped fund a war using winnings from a well known card game he invented Engaging and informative this book is perfect for anyone looking to deepen their understanding of probability

theory while enjoying some fascinating anecdotes along the way **Mathematics of the 19th Century** Andrei N. Kolmogorov,Adolf-Andrei P. Yushkevich,2012-12-06 The general principles by which the editors and authors of the present edition have been guided were explained in the preface to the first volume of Mathemat ics of the 19th Century which contains chapters on the history of mathematical logic algebra number theory and probability theory Nauka Moscow 1978 En glish translation by Birkhiiuser Verlag Basel Boston Berlin 1992 Circumstances beyond the control of the editors necessitated certain changes in the sequence of historical exposition of individual disciplines The second volume contains two chapters history of geometry and history of analytic function theory including elliptic and Abelian functions the size of the two chapters naturally entailed di viding them into sections The history of differential and integral calculus as well as computational mathematics which we had planned to include in the second volume will form part of the third volume We remind our readers that the appendix of each volume contains a list of the most important literature and an index of names The names of journals are given in abbreviated form and the volume and year of publication are indicated if the actual year of publication differs from the nominal year the latter is given in parentheses The book History of Mathematics from Ancient Times to the Early Nineteenth Century in Russian which was published in the years 1970 1972 is cited in abbreviated form as HM with volume and page number indicated The first volume of the present series is cited as Bk 1 with page numbers

Nuclear Science Abstracts ,1975 **Analysing Patients with Traumas** Franziska Henningsen,2023-04-21 The focus of this book is on detailed case histories of patients with severe traumas The author takes us through the successive stages of analysis and gives us a graphic impression of the progress of her diagnostic and therapeutic insights into traumatic processes and their treatment Her main interest is in the development of the transference countertransference relationship Traumatic experience has to be actualised within that relationship if it is to be treated successfully only in this way can therapeutic change become a feasible proposition Traumatic micro processes and trauma sequel phenomena in transference and countertransference are described and conceptualized The author demonstrates her point with examples taken from clinical practice illnesses experienced as traumatic separation traumas childhood experiences of violence adult experiences of violence war torture and displacement that can engender PTSD This book is a genuinely original contribution to psychoanalytic treatment of traumas Mathematical Reviews ,2002 **Engineering** ,1962 Topology Without Tears Sidney A.
