Chapter 1-10

CHAPTER 1 ACCOUNTING IN ACTION

CHAPTER LEARNING OBJECTIVES

1. *Identify the uses and users of accounting and the objective of financial reporting.* Accounting is the information system that identifies, records, and communicates the economic events of an organization to a wide variety of interested users. The going concern assumption presumes that a business will continue operations for enough time to use its assets for their intended purpose and to fulfill its commitments. The periodicity concept requires businesses to divide up economic activities into distinct periods of time. Qualitative characteristics include fundamental and enhancing characteristics that help to ensure accounting information is useful. Only events that cause changes in the business's economic resources or changes to the claims on those resources are recorded. Recognition is the process of recording transactions and
