

Behavior Rating Inventory of Executive Functions - Second Edition (BRIEF-2)

The executive functions all serve a "command and control" function; they can be viewed as the "conductor" of all cognitive skills. Executive functions help you manage life tasks of all types. For example, executive functions let you organize a trip, a research project, or a paper for school.

The BRIEF-2 was developed to provide a window into the everyday behavior associated with specific domains of the executive functions. **CLIENT's** parents and teacher completed a rating scale related to **CLIENT's** executive functions. T scores provide information about an individual's scores relative to the scores of respondents in the standardization sample. **His** results are below.

Although the primary focus is on the evaluation of problems manifested in the school setting many instruments reviewed are multi informant and are used to evaluate children across settings. All instruments reviewed have psychometric support. The contemporary assessment of children's behavior problems has moved away from exclusive reliance on rating scale interview methods to functional assessment of children in the classroom. As such a chapter on functional assessment which refers to identifying the function of the behavior with regard to reinforcement contingencies is included in the book. Also included is a chapter on curriculum based assessment methods for evaluating academic skill deficits relative to the child's curriculum. This chapter is included given the increased risk of academic weaknesses for children with behavior or attentional problems. Encyclopedia of Counseling Frederick T.
