Behavioural Finance William Forbes, 2009-12-21 Behavioural Finance builds on the knowledge and skills that students have already gained on an introductory finance or corporate finance course The primary focus of the book is on how behavioural approaches extend

what students already know At each stage the theory is developed by application to the FTSE 100 companies and their valuation and strategy This approach helps the reader understand how behavioural models can be applied to everyday problems faced by practitioners at both a market and individual company level The book develops simple formal expositions of existing attempts to model the impact of behavioural bias on investor managers decisions Where possible this is done grounding the discussion in practical numerical examples from the financial press and business life *Dawn of Behavioural Finance*, 1688 Vasileios Kallinterakis,2024-11-03 The role of psychology in investment decisions has been amply debated during the past few decades following the evolution of behavioural finance This book shows that although behavioural finance concepts were coined systemised since the 1980s their first traces are identified in Joseph de la Vega s *Confusion of Confusions* written in 1688 over 300 years ago To that end the book provides the first comprehensive assessment of *Confusion of Confusions* from the perspective of the behavioural finance paradigm Offering also a detailed discussion of behavioural finance itself and the historical context of Vega and his time it demonstrates that *Confusion of Confusions* constitutes the precursor to behavioural finance This book should be of interest to finance researchers and students particularly those focusing on behavioural finance and financial history The book s educational value for investors further renders it relevant to regulators and policy makers who can consider including it in financial education curricula
