Doing Effective Fieldwork Elia Shabani Mligo, 2013-03-13 We live in a context of change whereby postmodernity shapes our understanding and our searching for truth. Postmodernity dictates not only what kind of results we obtain in our researches, but also on the ways we use to search for truth. This means that postmodernity dictates the ways we do research in various disciplines, the ways we use to analyze the research results, and the ways we use to communicate the findings. Postmodernity is the paradigm in which we are greatly concerned. What is the place of rules of research, research ethics, selection of the problem, and designing of research as we consider the context whereby nothing absolute can be envisaged? How should one review the literature to suit this postmodern understanding of reality? How should one argue his or her case? This book is

designed to help students in higher learning institutions learn qualitative research methods in classrooms or by themselves It moves students and researchers from modern ways of understanding doing and communicating qualitative research towards postmodern challenges and promises In this case the book is worthy reading to every serious student and researcher who seeks to equip oneself to the current issues of qualitative research methodology
