Doing Qualitative Research in Education Settings, Second Edition J. Amos Hatch, 2023-09 An up to date clearly written user friendly guide that students and experienced scholars alike will find invaluable as they plan implement and write up qualitative research projects

Doing qualitative research in educational settings , [Case Study Research in Educational Settings](#) Michael Bassey, 1999-05-16 This book offers new insights into the case study as a tool of educational research and suggests how it can be a prime research strategy for developing educational theory which illuminates policy and enhances practice Several different kinds of educational case studies are identified namely theory seeking theory testing story telling picture drawing and evaluative case study and there are substantial examples of each of these The book develops the author s recent advocacy of fuzzy generalization Readers are taken through the various stages in conducting case study research including a helpful account of data collection and data analysis methods Each stage is underpinned by the concepts of trustworthiness and respect for persons Structured narrative and descriptive approaches to writing case study reports are also discussed and the value of conducting an audit is considered This will be a valuable text for students undertaking Masters and Doctorates in Education as well as staff in University departments of education and teachers carrying out small scale research projects

Disseminating Qualitative Research In Educational Settings Hughes, Christina, 2003-11-01 The processes and practices of the dissemination of research findings are exceptionally neglected fields in the research methods literature Yet disseminating and using our findings are significant reasons why we undertake research Organised in three parts this text provides an accessible critically informed and up to date overview of key aspects of dissemination

Fieldwork in Educational Settings Sara Delamont, 1992-01 Delamont s theme is that researchers should be motivated like pilgrims by lust of knowing Just discovering things is not enough the findings must be written up and eventually sold to an audience Flecker s caravan also contained poets who sing to find your hearts and merchants

carrying trade goods as well as being driven by that lust of knowing This book is designed to encourage researchers to seek the truth tell it eloquently and find an audience to buy it Most books emphasize the search for truth and neglect the reporting and marketing of the findings This one demands that the investigator should be poet pilgrim and merchant **Case Study Research in Educational Settings** Michael Bassey,1999 Readers are taken through the various stages in conducting case study research including a helpful account of data collection and data analysis methods Structured narrative and descriptive approaches to writing case study reports are also discussed *Policy Research in Educational Settings* Jennifer Ozga,2000 As outspoken in his day as Richard Dawkins or Christopher Hitchens are today American freethinker and author ROBERT GREEN INGERSOLL 1833 1899 was a notorious radical whose uncompromising views on religion and slavery they were bad in his opinion women s suffrage a good idea he believed and other contentious matters of his era made him a wildly popular orator and critic of 19th century American culture and public life As a speaker dedicated to expanding intellectual horizons and celebrating the value of skepticism Ingersoll spoke frequently on such topics as atheism freedom from the pressures of conformity and the lives of philosophers who espoused such concepts This collection of his most famous speeches includes the lectures The Gods 1872 Humboldt 1869 Thomas Paine 1870 Individuality 1873 Heretics and Heresies 1874

Historical Research In Educational Settings McCulloch,William Richardson,2000-11 What is historical research in education How can researchers get started in this area Why does this field offer a common project for historians educationists and researchers across the social sciences This book explores how to set about historical research in education The first general guide of its kind for fifty years the book locates this field in relation to changes in educational research historical research and a wide range of social sciences It offers a theoretical guide to the rationales and problems of the field as well as to current opportunities for research It also gives practical advice for getting started and for suitable research methods in different kinds of projects and in doing so draws critically on extensive international literature It includes detailed case studies on the following topics in historical research Curriculum and Classrooms Foucauldian Interpretations the Alternative Road Literacy in the Nineteenth Century and the University History Curriculum [Life History Research In Educational Settings](#) Ivor Goodson,Patricia J. Sikes,2001-09 It has long been recognised that life history method has a great deal to offer to those engaged in social research Indeed right from the start of the twentieth century eminent sociologists such as W I Thomas C Wright Mills and Herbert Blumer have suggested that it is the best the perfect approach for studying any aspect of social life In recent years life history has become increasingly popular with researchers investigating educational topics of all kinds including teachers perceptions and experiences of different areas of their lives and careers curriculum and subject development pedagogical practice and managerial concerns Life History Research in Educational Settings sets out to explore and consider the various reasons for this popularity and makes the case that the approach has a major and unique contribution to make to understandings of schools schooling and educational experience however

characterised The book draws extensively on examples of life history research in order to illustrate theoretical methodological ethical and practical issues

Doing Qualitative Educational Research Geoffrey Walford,2001 Reflecting the trials and tribulations and the problems and promises of conducting research this guide reveals the research process as a much more complex process than is usually recognised often messy and disorganised

Doing Qualitative Research Wolff-Michael Roth,2005-01-01 The author takes readers on a journey of a large number of issues in designing actual studies of knowing and learning in the classroom exploring actual data and putting readers face to face with problems that he actually or possibly encountered and what he has done or possibly could have done The reader subsequently sees the results of data collection in the different analyses provided The author shows how one writes very different studies using the same data sources but very different theoretical assumptions and analytic technique The author brings his publication experience in very different disciplines into play to provide readers with way of experiencing research as praxis The book is organized around six major themes sections in the course of which it develops the practical problems an educational researcher might face in a large variety of settings The book was written to be used by upper undergraduate and graduate students taking courses in research design and professors who want to have a reference on design and methodology

Policy Research in Educational Settings Jenny Ozga,1999-11-16 This book argues for independent critical research on education policy in the context of attacks on the quality and usefulness of educational research in general It takes issue with the argument promoted by government departments and agencies that education policy research should be limited to work that assists policy makers Against this position the book advocates independent critical research that scrutinizes policy in relation to its consequences for equality and social justice It argues that practitioners and academic researchers should form a research community that develops its own knowledge base from which so called evidence based policymaking in education may be assessed and challenged The book offers guidance on the theoretical and methodological resources available to practitioners and others with an interest in doing research on policy and discusses some of the main issues and problems in doing policy research on education It offers examples of research on policy at different system levels pursuing themes such as globalization changing governance of education selection choice and exclusion managerialism and the feminisation of educational management It argues for attention to the history of policy in education as a resource for understanding the present and concludes with recommendations for future research in areas where contestation of official agendas is needed

Education, Research and Perspectives ,2003

Narratives and Fictions in Educational Research Peter Clough,2002 This book considers the role and use of literary and ethnographic approaches in educational research

Proceedings of the Conference on Teacher Education for Sustainable Development in Ethiopia ,2007

The Moral Foundations of Educational Research Patricia J. Sikes,Jon Nixon,Wilfred Carr,2003 This title considers what is distinctive about educational research in comparison with other research in the social sciences As the contributors all agree that education is always an essentially moral enterprise

discussion about methodology starts not with the widely endorsed claim that educational research should be useful and relevant but with the attempt to justify and elaborate that claim with reference to its moral foundations Determining the nature of usefulness and relevance is not simply a matter of focussing on impact and influence but involves a radical re conceptualisation of the moral and educational significance of what is deemed to be useful and relevant There is no argument with this emphasis on the generation of useful and relevant knowledge but it is suggested that educational research requires a fuller and more rounded understanding that takes account of the moral values of those who conduct it Educational research is grounded epistemologically in the moral foundations of educational practice It is the epistemological and moral purposes underlying the usefulness and relevance of educational research that matter Empowering Students' Scientific Reasoning about Energy Through Experimentation and Data Analyses Hasan Abdelkareem,2008 **American Book Publishing Record** ,2003 *Curriculum about Others, Curriculum of Othering* Won Pyo Hong,2008
