Doppler Effect WS (614)

Have you ever noticed that the sound of a fire truck's siren changes as it passes you? This is because the sound waves in front of the truck are compressed as it comes towards you and stretched out behind the truck as it moves away from you. Remember, a shorter wavelength results in a higher frequency (and higher pitch), and a longer wavelength results in a lower frequency (and lower pitch). This apparent change in frequency is called the Doppler effect.

3. The changed pitch of the Doppler effect is due to changes in
a. Wave speed b. wave frequency
4. Circle the letter of each statement about the Doppler Effect that is true.
a. It occurs when a wave source moves towards an observer
b. It occurs when an observer moves towards a wave source
c. It occurs when a wave source moves away an observer
